Product Category	Company CID	Product PID	Product Description
Air Fresheners and Deodorizers	EZ5Y	EZ5Y-0005	Citrus with a twist scented environmental fragrancing diffuser blend.
	EZ5Y	EZ5Y-0006	Canadian forest scented environmental fragrancing diffuser blend.
	EZ5Y	EZ5Y-0007	Odor neutralizing blend for environmental fragrancing diffusers.
	H184	H184-0003	Our powerful Air Purifier is a must-have for cold and flu season. Spritz into the air to help purify and refresh any environment. For a stuffy nose, spray onto a tissue and inhale for a few moments. For cold relief at night, lightly spray on your pillow case.
	ZK91	ZK91-0011	All-natural spray eliminates stale odors instantly and freshens and disinfects on contact, without the synthetic disinfectants or artificial perfumes most air fresheners contain. This powerful antibacterial can be sprayed directly onto mildewed surfaces to clean and purify. Blue cypress oil is compounded into a natural grain alcohol and lemon peel oil base to kill germs and leave a fresh, natural fragrance behind. INGREDIENTS: Natural Grain Alcohol, Blue Cypress Oil, Organic Lemon Peel Oil, Manuka Oil.
	XB90	XB90-0001	Air Fragrances are 100% natural - made from the peel oil of citrus fruit.
	XB90	XB90-0005	Air Fragrances are 100% natural - made from the peel oil of citrus fruit. They are packed in unique, non-aerosol, continuous spray containers.
	XB90	XB90-0028	Air Freshener magically absorbs bad odors and freshens the air...Naturally! Using a unique formula that utilizes activated charcoal, Quickly absorbs foul odors, and freshens the air with a natural citrus scent! Ideal for odors caused by pets, garbage, smoke, mildew, dampness, chemicals, paintfumes, etc. Place in musty closets to freshen clothes, on the counter to give that "just cleaned" fragrance to bathrooms, and under the car seat to keep your vehicle showroom fresh.
	M3D3	M3D3-0034	Keep your home smelling fresh and inviting and keep the odors from returning. This non-staining formula is safe for use on fabrics, carpets, pet areas, furniture, pillows, mattresses, draperies, shoes, bathrooms, and nurseries. Environmentally safe for use in homes, businesses, hotels, boats, cars and motorhomes. Freshens stale air and musty fabric odors.

JC9H	JC9H-0038	Essential oil based, non-aerosol air freshener. No harmful chemicals to breathe in. 125ml plastic spray bottle. There is no magic science to air fresheners. They do not remove smells or make the air any cleaner, they just overpower with another smell.
W4AU	W4AU-0008	Aromatic blend of Patchouli and citrus oils used as a room and linen spray.
W4AU	W4AU-0009	Assists with focusing and long term computer work along with refreshing the mind. Essential oils of peppermint, rosemary and lemon grass stimulate the senses. Just shake gently prior to each use, as these natural sprays do not contain propellants nor glycols to combine the oils and water. Common Sense: Test prior to full application on fabric - water or oils may spot certain types of delicate fabrics. Also, do not spray close to or over electronics.
W4AU	W4AU-0010	Blended with essential oils known to disinfect and contain anti-bacterial properties, perfect for kitchens, offices or anywhere freshness is needed. With the scent of lemon, lavender, eucalyptus, rosewood and more, you'll find it's a practical and pleasant spray to use.
W4AU	W4AU-0011	The most versatile spray we make! Essential oils of Lavender and Ylang Ylang are blended to create a soothing yet fresh clean scent. Not a heavy floral in the least, men as well as women have found this to be a great room spray. Because we only use distilled water, witch hazel and a bit of grain alcohol for a preservative in our sprays, you are able to also use them for a facial pick-me up mist.
W4AU	W4AU-0012	Think tropical, think southern - either way this exclusive blend of oranges and Egyptian jasmine is our favorite. Light, sweet and floral, which makes it perfect for linens, children's rooms and all around the house. We handcraft our aromatic mists to also be gentle enough to use as a body spray too. 2 ounce cobalt blue glass spray bottle Just shake gently prior to each use, as these natural sprays do not contain propellants nor glycols to combine the oils and water. Common Sense: Test prior to full application on fabric - water or oils may spot certain types of delicate fabrics. Also, do not spray close to or over electronics. Do not spray directly into eyes, essential oils maybe an irritant to certain skin types.
Y191	Y191-0051	Ingredients: Rose Bulgaria Hydrosol & Peppermint Essential Oil. An alternative to the rose, lavender is not only refreshing but calming as well. Use this to refresh yourself anytime. Personal Summers; Power Surges, it really doesn't matter the name. This stuff ROCKS.
HZDR	HZDR-0006	This product is made with non-hazardous materials using naturally based ingredients, as well as an all-natural insect repellent- Geraniol.

KB96	KB96-0014	Wee ones can certainly pack an odiferous punch when it comes to containers holding cotton or disposable diapers. Our Freshener contains essential oils of Geranium, Orange, Jasmine, Coriander, Rose and Bergamot; and a vegetable protein extract to counteract malodors.
KB96	KB96-0016	Enliven your home with our aromatic and naturally fragrant essential oils. Simply spray in every room for a clean, fresh experience. Non-aerosol.
FCM9	FCM9-0010	Called by many "the best air fresheners ever," our formulations include only the finest essential oils and plant extractives. Beautiful package graphics. 7-ounce, non-aerosol, pump-spray aluminum bottles.
B342	B342-0011	I am a room freshener... Sit me on a plate in a room and I will fill the air with wonderful scents. To refresh me just blow dry me on a low heat setting until soft. Great for Kids rooms, College dorms, Nursing homes, or even your home.
B342	B342-0013	Bags are filled with scented corn cob and are perfect for use in cars, closets, bathrooms, and dresser drawers. My kids take one of these at the start of every school year and put them in their lockers. I have also had a customer tell me they have put these in their registers in their house and when the furnace kicks in the heat comes up the registers and smells up the room. They love them.
QS3A	QS3A-0001	When you spray the air or on surfaces powerful enzymes break apart the molecular bonds of odor-causing compounds to eliminate both odors and harmful contaminants. Smells are permanently removed when the molecular bonds are broken. Biotechnology has made it possible for us to bottle a potent combination of plant-derived enzymes without the use of chemicals or alcohol. Easily eliminate any odor including strong odors like cat urine, smoke, skunk and cooking smells
TA8E	TA8E-0004	This is a non-toxic air freshener made from completely natural and biodegradable ingredients. Safe for both the environment and your health, this product contains no chemical perfumes, therefore it is perfect for people with chemical sensitivities.
H3HU	H3HU-0002	<ul style="list-style-type: none"> • A blend of botanical extracts that destroys outdoor odors using our Technology. • One gallon of diluted product treats 1,000 square feet.
H3HU	H3HU-0008	A unique water-based odor control formula that destroys malodors instantly. Odor neutralizer - not a masking or covering agent, leaving air smelling clean and fresh.
SF92	SF92-0001	

SF92	SF92-0002	An all-purpose cleaner & odor eliminator on all types of indoor & outdoor areas. Stimulates friendly bacteria which help degrade waste, control odors and remove stains. A unique bio-catalyst, offers an efficient, safe and inexpensive alternative to the hazards of chemicals and the inefficiency of bacterial/enzymatic compounds. The cleaner stimulates naturally occurring microorganisms to efficiently digest organic compounds. Vegetable- based; contain no microorganisms; are stable; 100% natural, organic and biodegradable; non-toxic and non-hazardous; safe for humans, animals, and plants; have no special handling requirements; release no fumes or irritating vapors; and are non-flammable and non-corrosive to metals, concrete or plastics.
SF92	SF92-0003	
TPHG	TPHG-0001	Non-aerosol air freshener of natural essential lavender oil. Contains ethanol, derived from corn. 100% biodegradable.
TPHG	TPHG-0005	Using a natural way to remove odors, this product eliminates skunk odor from your pet, fabrics, carpeting, tile, sealed wood floors, upholstery, furniture, and any surface not affected by water. Doesn't irritate skin, pets' coats and paws. Safe for your pet, for you and the environment.
TPHG	TPHG-0006	Non-aerosol air freshener of natural essential cinnamon oil. Contains ethanol, derived from corn. 100% biodegradable. Non-aerosol air freshener of natural essential cinnamon oil. Contains ethanol, derived from corn. 100% biodegradable.
TPHG	TPHG-0007	Non-aerosol air freshener of natural vanilla oil. Contains ethanol, derived from corn. 100% biodegradable.
TPHG	TPHG-0028	Suppresses unwanted odors and clears them away. Our all natural formula is safe to use in virtually any area where odor control is needed. Leaves the air noticeably fresh wherever you use it. Because natural ingredients are used color and body may vary.
TPHG	TPHG-0037	This naturally based formula is great for eliminating odors/scents of kitty urine and waste. It is especially useful for homes with multiple cats. Safe for your pet, for you and the environment.
CO74	CO74-0001	Awakens the spirit of love. Bring the magic of romance to any occasion. Spray with abandon and let the spell linger.
CO74	CO74-0002	Lavender essential oil to calm and sooth and peppermint to uplift. A massage for the senses.
CO74	CO74-0003	This spray weds the essence of pure rose, the symbol of love, with a hint of pachouli to bring the rose to full bloom.
CO74	CO74-0004	An exotic bouquet of ylang ylang, jasmine, pachouli, bergamont and vanilla. Experience sensuous pleasure with Jade Flower. Check availability.

CO74	CO74-0005	A perfect balance of sandalwood, frankincense and rose oils. In ancient times, sandalwood was used as an aphrodisiac, especially for men. Check availability
CO74	CO74-0006	Has an invigorating woody aroma. A combination of fir needle and cedarwood essential oils will transport your senses to a high mountain forest. This Mist is a blend of fir needle, cedarwood and patchouli essential oils, which helps repel pests. This scent transforms your pet areas into a high mountain forest.
CO74	CO74-0008	Has all the bacteria and odor fighting qualities of our Citrus with that great fresh from the orange tree scent
CO74	CO74-0009	An antibacterial, antiviral spray and natural alternative to chemical air fresheners. It uses eucalyptus, fir needle, and peppermint essential oils.
CO74	CO74-0010	Eliminates the odor of skunk spray. The essential oils of orange and eucalyptus in this product gets rid of the musk oil from porcupines and unpleasant smoke odors too
CO74	CO74-0011	A blend of eucalyptus, fir needle, peppermint, and spruce essential oils. The concentrated refreshing scent is an effective antibacterial spray for pets and their sleeping areas.
CO74	CO74-0012	Made from pure jasmine oil, a rare and precious oil. Many products use cosmetic fragrances, which does not compare to real jasmine oil. Use on your pet when only the very best will do
CO74	CO74-0013	A blend of lavender, peppermint, and lemongrass essential oils. Lavender and peppermint are calming and have antiseptic properties. Lemongrass is an effective natural repellent of insects.
CO74	CO74-0015	Jade is an exotic blend of the essential oils of ylang ylang, jasmine, patchouli, bergamont and vanilla. Ylang ylang is an intriguing slightly spicy scent that will make your pet and pet areas smell absolutely wonderful.
PQ52	PQ52-0011	Leaves everything smelling fresh and clean, like a New England forest in the morning dew. Dilute 1:30 with water for a room air spray, or 1:10 for garbage cans, litter boxes, pet odors, etc.
BAJ3	BAJ3-0007	Shake well and simply spray into the air to neutralize odors
RU84	RU84-0001	Distributes this: Expel unpleasant smells with citrus oils - not synthetic fragrances. A wonderfully fresh fragrance that actually removes odors instead of just masking them with synthetics. Doctor-approved and biodegradable. Choose orange or lime in a 7 oz. pump spray. USA.
RU84	RU84-0008	Distributes this: With its powerful anti-moth and anti-flea formula, Cedarwood Oil can refresh the scent of cedar blocks and chests, treat pet beds and remove musty smells. 100% natural cedar oil in a mineral oil base. 8 oz. pump bottle. USA. 2 bottles.

RDO8	RDO8-0080	Ready-to-use, powerful and virtually nontoxic to people, plants and animals. It destructively eliminates odors on contact without covering fragrances.
Y306	Y306-0013	An odorless, non masking, non toxic, hypo-allergenic deodorizer made from American grown resources that puts the power of nanotechnology into the hands of the consumer to quickly clean and permanently destroy the source of odors caused by smoke, urine, feces, vomit or any other organic waste decomposition. Most odors originate from the decomposition of organic matter and breaks up this matter and washes it away.
A33R	A33R-0009	Everyone needs a little fresher air once in a while, but spraying all those harsh chemicals into the air, yuck! We have the solution. Nontoxic Our Freshener is nontoxic and concentrated. It helps eliminate odors. Natural Ingredients It is made with natural ingredients and the scents are from essential oils of citrus fruit.
LH6W	LH6W-0004	Spray is an all natural aromatic scent concentrate, consisting of the purest botanical extracts with natural trans-penetrates that will enhance flavor & bouquet. May be watered in, added to stock tanks, or used as a foliar spray. It can be used alone or in conjunction with other foliar sprays. Not a plant food.
O56F	O56F-0008	A water-based air freshener and deodorant. Use whenever and wherever odors are a problem. Instantly eliminates odors from smoke, fish, food, mildew, pets or virtually any organic odor. Spray works in the air for hours. Also an excellent carpet and fabric deodorizer
RZZ3	RZZ3-0001	Spray is the all-natural way to spray with 100% pure essential oils. Good for bad smells wherever they may waft: bathroom, bedroom, closet, car, furniture, even after you just froofurred.
NN56	NN56-0023	Spray is very similar to the foot spray except it is designed to be applied to materials and areas as opposed to the skin. It is made with a special blend of essential oils, again including tea tree and peppermint essential oils that will help keep your gym bag and locker free of nasty odors. This spray actually helps kill bacteria naturally. You can even spray this in your sports shoes to keep down those nasty odors.
OT17	OT17-0001	What happens when you smell something unpleasant? If you're like us, your nose crinkles. That's why we developed this aromatic spray mist, which eliminates odors by cleaning the air. One little spritz from this non-aerosol can and you unleash natural aromatics that dissolve odors on contact. So you don't have to crinkle your nose. Available in vanilla + apple, eucalyptus + mint, freesia blossom, grapefruit + pear, lavender + lemongrass, and sweet water.
SOON	SOON-0001	A 100% natural purifying mist for the air you breathe, with aromatherapeutic benefits. One Spray Does it! Last for Hours!

QCPB	QCPB-0001	An anti-viral, anti-bacterial, anti-fungal spray that promotes the properties of a special blend of peppermint and spearmint essential oils. All Natural.
S800	S800-0001	Spray to recover a feeling of hope and sense of perspective. Can help disperse, negative, pessimistic energy.
LC8H	LC8H-0024	Keep your home smelling fresh and pet-free with our Freshening Spray in the soothing scents of Chamomile and Clary Sage. Created with our furry pals in mind, this is so gentle and light that it can be applied directly to carpet, upholstery, even your pet's bed.
GA6U	GA6U-0005	The most advanced, synergized bio-enzymatic formulation designed to instantly control malodors and provide long lasting deodorization. Contains an ingredient that instantly neutralizes malodors. This product exhibits exceptional cleaning. The spore based, multi-strain bacteria system exhibits greater enzyme production to promote faster grease liquification and germination. Each gallon contains over 200 billion synergized bacteria. Quarts are packaged with dispenser tops.
L6BX	L6BX-0005	Spray in the air or apply directly to any odor area. Pleasant fragrance works instantly by deodorizing and purifying. Great for pet odors. Ready to use.
BNK2	BNK2-0002	Advanced cleaning and odor control technology that combines fast acting chemistry to capture odors with the long term benefits of bacteria to destroy the odor-causing organics. Use to control odors around garbage collection areas, pet containment areas, garage and basement surfaces and loading docks. This freshner can also be used to remove stains and odors from carpets, drapes and upholstery.
VQQA	VQQA-0001	A broad-spectrum odor neutralizer. It controls the full spectrum of odors (eliminating the need for multiple odor control products), and breaks them down for complete odor removal, leaving no peripheral odors or odorous byproducts.
M2RO	M2RO-0020	Contains a blend of organic plant oils that absorb and destroy odor molecules on contact. It then replaces the offensive odor with a light refreshing citrus aroma. This non-toxic biodegradable formulation may be used as an air freshener or mixed with cleaning solutions to eliminate unwanted odors. Effective on a variety undesirable odors; including smoke, cooking and waste odors. It is ideal for use in kitchens, bathrooms, and offices.
D5XU	D5XU-0009	Water soluble chemical deodorant concentrate. Chemically neutralizes odors by eliminating their presence. Non-toxic, safe to use, biodegradable. USDA C1.

I61E	I61E-0008	We use only the purest essential oils and plant extracts to make our aromatherapy air refreshers. Most commercial air fresheners mask odors, our "Air Refreshers" are all natural, and the essential oils actually neutralize, rather than mask, odors; and provide the relaxing uplift of aromatherapy. Product contains water, a blend of pure essential oils, alcohol (from grain), and polysorbate 20 (derived from sorbitol, which is found in berries and fruits). Available in citrus, lavender, peppermint, and spice scents.	
H35A	H35A-0009	Make your drive a pleasant one with "Sweetness, or cozy up your kitchen with "Cinnamon Spice. Leave in your bathroom, kitchen, garage, basement, bedroom, or anywhere you want a fresh scent to brighten your experience. We offer you an entire line of 100% natural, cruelty free handmade cleansers for your entire house!	
H35A	H35A-0012	Place this small mesh bag inside baby's diaper pail, baby's laundry basket, anywhere in the nursery, and smell the difference. This natural odor absorber is made of volcanic rock! You can rejuvenate the odor sponge by placing it in the sun for several hours and it will last for years!	
CV6W	CV6W-0001	Attacks odors trapped in carpeting, upholstery, and draperies without staining.	
CV6W	CV6W-0002	Attacks odors trapped in carpeting, upholstery, and draperies without staining.	
XTHE	XTHE-0002	An eco-sensitive stain and odor remover that combines renewable corn-based ethanol, plant-based cleansers and natural bio-cultures to remove tough stains and odors. The customized nozzle allows for targeted saturation into carpet fibers and padding, ensuring that the solution gets to the problem area beneath the surface so pets will not return to the area.	
C69A	C69A-0001	An odor neutralizing technology using 100% all-natural essential oils and plant extracts. This scientifically proven product eliminates odors by attracting odor particles, attaching to them and neutralizing them. No enzymes or harsh chemicals are required, just nature's technology. This product is revolutionizing all-natural odor removal, while supporting better personal and environmental health. Comes in Indian Summer, Lavender, Neutral Scent, Tropical Citrus	
Asphalt and Tar Removers	P67X	P67X-0007	Recommended for removal of road tar, asphalt, heavy grease, oil and tough grime from all equipment, trucks, concrete floors and metal parts. Effectively removes sludge from oil tanks. Used by municipalities, roofing and black top contractors to clean tools, equipment and work areas.

X3E5	X3E5-0008	Equipment friendly asphalt remover. Works on all types of asphalts including difficult-to-remove polymer based asphalt. Also works at all temperatures.
X3E5	X3E5-0009	Equipment friendly asphalt remover. Works on all types of asphalts including difficult-to-remove polymer based asphalt. Also works at all temperatures. Takes twice as long to work and uses twice as much.
G79F	G79F-0006	Safely penetrates, dissolves and removes the toughest tar, asphalt, pavement sealer, oil, grease & sludge. Fast acting; in as little as 30 seconds you'll see how this product cuts cleanup time in the toughest cleaning applications.
WEL3	WEL3-0001	No odor, non flammable and environmentally friendly, everything you ever wanted in a cleaner. This new cleaner dissolves grease, oil, asphalt, and sealant while it protects the paint finish on the equipment surface being cleaned. It's biodegradable, effectively dissolving sealant and asphalt build up on all painted or unpainted surfaces, then leaves an invisible protective coating to help reduce future buildup.
NAP5	NAP5-0005	Penetrates, Dissolves and Removes: tar, asphalt, heavy grease, polishing compounds, most sealcoats, oil & lubricants, dirt, sludge, cutting oils. Appropriate for use in: dip tanks, wipe cleaning, pressure spray units, ultrasonic. An effective industrial-strength product, yet does not compromise environmental or worker safety. It is a perfect replacement for hazardous or petroleum distillate-based products traditionally used for asphalt and tar removal.
Y8EG	Y8EG-0003	Made from 100% American grown soybeans. Specially formulated as 100% biodegradable and non-petroleum based, makes taking off difficult, high-oil type asphalt quick and easy.
SEQ6	SEQ6-0001	
SEQ6	SEQ6-0003	
DN29	DN29-0003	A super strength tar remover that derives its power from 100% of the solvents extracted from orange peels. This product contains no chlorinated solvents or harsh chemicals and is not corrosive. It is over 90% active ingredient. The natural product will leave surfaces clean in one step. Use for all purpose degreasing tar and asphalt removal, insect removal, tire mark removal, tile & tub cleaner, spot removal, and many other tough cleaning jobs. Use this product where a tough solvent or tar remover is needed.
K994	K994-0002	A heavy concentrated solvent mixture with a citrus fragrance for removing of tar, asphalt, road debris and tree sap from your auto paint. Easy to use and is safe for all clear coat finishes. Although tar can damage your paint is left alone for long periods of time, you need a strong tar remover that is going to be safe yet effective in the removing of tar from your auto.

J3TP	J3TP-0042	Soy-based concrete and asphalt release product. Primary application is to remove asphalt from tools and other surfaces	
D61B	D61B-0001	A powerful citrus-based asphalt and tack remover. Quickly and easily dissolves and removes fresh and dried oil, tar, tack, liquid asphalt, petroleum, etc. from paving equipment and tools.	
RYB8	RYB8-0013	A blend of orange terpenes and surfactants. The product has been especially formulated to enable the product to rinse aggregate and filters with water. Was specifically developed for use in asphalt extraction tests using either a vacuum or centrifuge extractor. It also serves as an excellent cleaner for laboratory glassware, equipment and asphalt plant and paving equipment. It is an ideal alternative to chlorinated solvents traditionally used for performing asphalt content extraction tests on bituminous highway mix.	
RYB8	RYB8-0015	Cleaning products contain a high purity mixture of methyl esters, also known as "soy solvent" and "biodiesel". These products are based on natural, renewable raw materials and are considered essentially non-toxic and readily biodegradable. Insoluble in water. Both products are ideal replacements for diesel fuel formerly used for asphalt cleaning and truck bed release applications, and now outlawed by Federal Regulations. In general, products are well suited for removing asphalt from equipment, tools and vehicles. Both products are less aggressive, less odorous and less expensive than citrus based products typically used for asphalt cleaning applications. Both products are compatible with plastic and metal equipment.	
VN48	VN48-0001	A strong solvent that dissolves old tar, wax build-up, grease, road grime, silicones and fresh tree sap from paint finishes, rubber, glass or metal vehicle parts. It's also used as a surface prep before painting.	
Asphalt Restorers	W556	W556-0001	Comprised of bitumen (naturally occurring deposits of bitumen are formed from the remains of ancient, microscopic algae and other once-living things). Upgrades drab, grey, stained asphalt Covers old line markings and repairs Avoids costly re-surfacing

SEQ6	SEQ6-0002	Activate utilizes soy-based polymers as part of its formulation to create a matrix that actually reverses the oxidation process that breaks down traditional petroleum-based asphalt roadways. Activate blends with reclaimed asphalt pavement (RAP) in a cold mix, strengthening all aspects of road construction in a biobased manner, which can significantly cut down on costs. Reclaimed asphalt pavement is heated to a certain temperature before it can be reused on paved roadways. By treating RAP and aggregates with Activate, asphalt is fully restored and can be reused as cold paving material.	
SEQ6	SEQ6-0012	Asphalt pavement preservation material. Treatment for good pavements to waterproof and adds polymers to create a better binder in pavement matrix.	
X3E5	X3E5-0006	A biobased penetrating seal which reverses the oxidation, reduces potholing, and preserves the asphalt. It extends the life of the asphalt by 10-15 years at a fraction of the cost of conventional road surface treatments.	
X3E5	X3E5-0007	Activate utilizes soy-based polymers as part of its formulation to create a matrix that actually reverses the oxidation process that breaks down traditional petroleum-based asphalt roadways. Activate blends with reclaimed asphalt pavement (RAP) in a cold mix, strengthening all aspects of road construction in a biobased manner, which can significantly cut down on costs. Reclaimed asphalt pavement is heated to a certain temperature before it can be reused on paved roadways. By treating RAP and aggregates with Activate, asphalt is fully restored and can be reused as cold paving material.	
TRHZ	TRHZ-0001	Asphalt pavement preservation material. Treatment for good pavements to waterproof and adds polymers to create a better binder in pavement matrix.	
CBF9	CBF9-0001	Ready to use - Easy to apply Will take foot traffic after 2-4 hours Multiple coats possible for rough areas Can be applied to concrete Produces a sealed, repaired slip-resistant	
Blast Media	FR79	FR79-0001	A complete line of blasting materials available in all types and sizes. Made of Walnut shells, Corn Cobs and other natural substances.
	T51B	T51B-0001	The shells are crushed down into just a starch which is provides an abrasive material for blast sanding.

F795	F795-0030	Proven through years of on-the-job performance, wheat starch media has won widespread acceptance in commercial, private, and military aviation circles. We offers broad operational flexibility, numerous user benefits, and solid production experience spanning the last decade. The wheat starch stripping process removes coatings using a polymerized form of wheat starch propelled by pressurized air. The low pressures, typically 20 to 40 psi, and relatively soft media have minimal effect on the surfaces beneath the coating or paint. This process removes virtually every type of aerospace coating, allowing a broad range of applications on both metallic and composite materials. Wheat starch media is preferably used in specially designed equipment, or any light abrasive blasting system (e.g. plastic media) fitted with appropriate modifications. Dry stripping with wheat starch media is performed worldwide in hand cabinets, blast rooms, and full-scale (hangar) aircraft depaint operations.
F795	F795-0031	Corn hybrid polymer opens the way to a new range of aerospace dry stripping applications not previously served by natural dry stripping media. Preserves the unique mechanical properties of wheat starch media and incorporates the same features and benefits. But, this molecularly-engineered corn polymer offers a number of additional and distinct advantages for the end-user. This product removes coatings in a similar manner to wheat starch media. The product is propelled by pressurized air at low pressures, typically 20 to 40 psi. Like wheat starch media, can remove coatings with minimal effect on the surfaces beneath the coating or paint. It removes virtually every type of aerospace coating, allowing a broad range of applications on both metallic and composite materials. The added advantage of corn hybrid polymer (CHP) is that it can be used in all light abrasive blasting systems (e.g. plastic media) without limitation. With flowability characteristics similar to plastic media combined with substantial moisture resistance, is a true drop-in replacement for plastic media blast (PMB) material. Now the full benefit of the wheat starch media technology can be obtained without the need for costly equipment modifications.
F795	F795-0029	A hybrid corn starch and acrylic plastic based product that exhibits mechanical properties similar to starch abrasives, but performance characteristics similar to Mil Spec approved plastic media. It is suitable for metallic and composite substrates.
S5G6	S5G6-0002	Is a corncob tumbling media used to polish spent brass shells before reloading.
S5G6	S5G6-0006	Chemical used for abrasive and polishing metal. It is based off corn cob. Comes in different sizes, A1, A2, and A3

BPW1	BPW1-0002	Non-Toxic blast cleaning media - causes no health or enviromental hazards	
BPW1	BPW1-0003	We pioneered Walnut Shell abrasive blasting with the US Navy in the 1950's. Aircraft carriers and submarines were stripped of only their top coats, leaving the expensive undercoats undisturbed. Prior to the introduction of shell blasting, coatings were removed down to bare metal requiring the replacement of the undercoat, the vinyl coat, and the top coat. The idea of SELECTIVE COATING REMOVAL with a soft abrasive, originated here and saved the Navy both time & money.	
BPW1	BPW1-0001	Non-toxic blast cleaning media, Specific gravity-1.2 - 1.4 Angular, multi-faceted For removal of paint, flash, burrs and other flaws in plastic, aluminum and zinc die casting, and electronics industries As a sand replacement for paint removal, graffiti removal and general cleaning in restoration of buildings, bridges and outdoor statuary For aircraft engine cleanout For cleaning steam turbines.	
A3NJ	A3NJ-0004	Corncob grit polishes and deburs parts and at the same time cleans and dries parts. Oils and other liquids from wet mass finishing processes are absorbed. Grade selection is typically based upon the finished surface profile desired and the diameter of any holes or cavities in the part. The selected grade should not contain particles that would lodge in part openings.	
N445	N445-0001	Corn cob blasting grit is a safe blasting media for delicate parts in addition to use as the preferred blasting grit for log homes and other wood surfaces.	
N445	N445-0002	Walnut shell blasting grit is an excellent replacement for sand (free silica) to avoid inhalation health concerns.	
Candles and Wax Melts	A3V1	A3V1-0001	This soy based wickless candle can be warmed up to spread an aroma throughout a room.
	H428	H428-0001	A true high end candle line for those who enjoy indulging in luxury. If you love to be pampered in rich quality, then this is the candle line for you. Every candle is Handmade!
	H428	H428-0002	Floating candles will give complete justice to the beauty and elegance of natural scents. Each unscented candle measures 3"h x 4"w and comes in your choice of color. Simply breath taking!
	H428	H428-0005	All melts are made with a soy blend which provides a cleaner aromatic experience.

PBP2	PBP2-0001	Our candles are made with top of the line, quality ingredients, and made in the USA. Our wax is a unique paraffin / soy blend, which provides a clean, low soot burn along with a smooth, creamy appearance with excellent burn times.
P15D	P15D-0004	Need a breath of fresh air? Try our Soy Candles. Soy candles are known to burn 30% cleaner than petroleum wax based candles. Our soy candles burn for approximately 15 - 50 hours and are blended with fragrances that will make your scenes sing and dance.
RU58	RU58-0001	An ultra-fragrant hand-poured body massage candle that, when burned, melts to create a healthy body massage oil that can be used to enhance the healthy of your skin.

BBU1	BBU1-0002	Long lasting & natural pure soy wax. Soy candles burn slower and cooler (helping to better distribute fragrance), are non-toxic, less likely to trigger allergies, produce very little soot and the containers can be cleaned up with soap and water. These factors tend to make them more animal and child-friendly than traditional candles. Made from American-grown soybeans, a renewable resource, they are biodegradable. Our soy wax candles have an all-natural cotton wick that limits the emissions of harmful soot and fumes.
QRW6	QRW6-0001	If you have not worked with natural waxes before you may find that you need to modify your candle making procedures. For example, we recommend large wicks, 2 to 3 sizes up from what you would use for a corresponding size paraffin wax candle. Pouring temperatures may be lower than you are used to, we recommend keeping the pour temperature as low as possible for the container blends.
EZNC	EZNC-0001	A revolutionary candle making Co., making new, improved, long lasting soy candles. We are launching a huge marketing program to spread the word about this new product.
EZNC	EZNC-0002	Our 2oz Votives come single, in 2pk, or 4pk. Burning time is approx. 17 hrs.

O956	O956-0024	Burn time: 40 minutes per inch.
O956	O956-0025	These festive candles are accented with traditional holly trim. All are packaged with a card. They are just the right touch to set the tone for your holiday get together.
O956	O956-0026	Burn time: 40 minutes per inch.
O956	O956-0027	These 100% beeswax candles have a unique, hollow design that creates a glowing crown as they burn.
O956	O956-0028	Expanding the borders of old technology and with unfailing attention to detail candles has succeeded in merging traditional with modern, and has brought into being this treasury of candles to honor the Risen Christ.
O956	O956-0029	3" x 13 1/2" Wedding Candle, ea.
O956	O956-0030	The permanent glass holder holds the plastic disposable insert. When plastic contained candle is consumed, simply remove and discard the empty insert. Less freight and easier storage make this a smart buy. 5, 6, and 7 day inserts all fit in standard 8-5/16" glass holder. 3 day insert hangs from top of holder and fits both 5" and 8-5/16" glass holders.

O956	O956-0031	Expanding the borders of old technology and with unfailing attention to detail, candles has succeeded in merging traditional with modern, and has brought into being this treasury of candles to honor the Risen Christ.
O956	O956-0032	Expanding the borders of old technology and with unfailing attention to detail, candles has succeeded in merging traditional with modern, and has brought into being this treasury of candles to honor the Risen Christ.
O956	O956-0033	Our candles display outstanding craftsmanship and adherence to the highest standards of design and artistic talent. Our embossed candles have the design burned into the candle, and are then hand painted.
O956	O956-0034	The special devotional candle with full six day burning time. Not a decal, but each glass individually painted. Ideal for special events, church anniversaries and fund raising. 2-13/16" x 8-1/16". One Patron Saint design per case.
O956	O956-0035	They come in 8 inch and 12 inch sizes.
O956	O956-0036	Individually boxed.
O956	O956-0037	The ruffled edge dominates this variation of our double spirals.
O956	O956-0038	This product is a 100% bees wax candle.
O956	O956-0039	Expanding the borders of old technology and with unfailing attention to detail, candles has succeeded in merging traditional with modern, and has brought into being this treasury of candles to honor the Risen Christ.
O956	O956-0040	The subtle snowflake design has been added to our traditional spiral candles, providing an delicate accent as we are reminded of the individuality and intricate pattern of a single snowflake.
O956	O956-0041	Expanding the borders of old technology and with unfailing attention to detail, candles has succeeded in merging traditional with modern, and has brought into being this treasury of candles to honor the Risen Christ.
O956	O956-0042	Expanding the borders of old technology and with unfailing attention to detail, candles has succeeded in merging traditional with modern, and has brought into being this treasury of candles to honor the Risen Christ.
O956	O956-0043	Its origin tells of a time when the Morning Stars sang together. Something extraordinary happened in the night sky over 2,000 years ago, a portent heralding the birth of Christ. In every Christian heart a Star of Bethlehem brightly glows, as each year we anticipate that Divine birth. Smallest on the first week of Advent, the legendary star grows larger as Christmas nears, in perfect tandem with out desire to reach nearer to those events which forever changed the world.

O956	O956-0044	Its origin tells of a time when the Morning Stars sang together. Something extraordinary happened in the night sky over 2,000 years ago, a portent heralding the birth of Christ. In every Christian heart a Star of Bethlehem brightly glows, as each year we anticipate that Divine birth. Smallest on the first week of Advent, the legendary star grows larger as Christmas nears, in perfect tandem with our desire to reach nearer to those events which forever changed the world.
O956	O956-0045	Impressively , the 3" x 12" center candle is lighted by the 7/8" x 9" Bride and Groom side candles.
O956	O956-0046	Center candle is 3" x 13 1/2" and two side candles are 7/8" x 12".
O956	O956-0047	The simplicity of this solid beeswax candle featured above provides a natural elegance to any decor. Burn Time: 90 minutes per inch Wrapped in pairs, 6 pairs of one color and size per carton.

J1GE	J1GE-0004	All travel tins shown in our 6 ounce tin.
J1GE	J1GE-0005	Our Collection is made from our exclusive blend of soy wax, palm wax and other natural Vegetable waxes to create a truly unique quartz looking candle. We use the same unique fragrances and cotton wicks as used in all of our other great products to assure you a clean, soot free burning experience, every time.
J1GE	J1GE-0006	Votives are made using the finest all natural wax available on the market today. Each is 2.5 ounces and burns Approximately 18 hours. They are available in gift boxes of 4 (same scent) or bulk boxes of 18. Also be sure to check out our unique collection of votive cups and holders.
EE3X	EE3X-0001	These candles burn much more slowly than regular candles. Soy also burns cleaner than other waxes, and when the candle is burned out, you can simply wash any leftover wax with soap and water. There's no need to try and melt the wax out of the candle holder using the microwave. This makes a GREAT gift for the "natural products" people in your life.

DIN3	DIN3-0001	Available in 13 oz. Container Candles, 9 oz. Container Candles, 10 oz. Travel Tins, 8 oz. Travel Tins, 4 oz. Travel Tins and Tea Lights

E258	E258-0001	Candles are environmentally friendly, they're made of 100 percent soy wax.
U254	U254-0003	An amazing way to experience our timeless fragrances is with our exclusive long-burning soy wax container candles. Our soy wax blend is available in all of our highly fragranced container candles. All soy candles are hand-poured using lead-free cotton wicks, natural essential oils, and essences. Pacifica soy candles are the cleanest burning soy candles available.
M32J	M32J-0001	Site under construction, no description given.

U5FA	U5FA-0001	We offer scented soy candles in jars, votives, three wick candles, pillar candles in many sizes, hand-carved candles, electric candles, hand-dipped tapers and more!
D21Z	D21Z-0001	Our candles are all hand poured. Our large, medium, and small candles are made in a frosted honey pot jar with a frosted flat round glass lid. Our mini candle is made in a clear honey pot jar with a cork lid. Each candle has a colored sheer organza ribbon tied around the top to indicate the scent of the candle. Our top label also has the scent name colored to match the ribbon. This adds a little splash of color to our all white candles.
C214	C214-0001	Soot Free Scented Candles Handmade With Vegetable Blend Waxes Clean Burning.
W3H6	W3H6-0002	Our Earth friendly Soy Candles burn up to 30% longer than traditional paraffin candles. (Approximately 50 hours of burn time in a 6 oz. candle!) We also use clean burning , lead-free wicks to leave your home (and lungs) free of messy soot.
MI78	MI78-0001	Soy wax candles.
MI78	MI78-0002	Melt point of 135°F. Formulated to seal tight against container surface to prevent air pockets in wax. Blends well with wax color and dye for even color. Efficient wax burn provides aroma throw for scented candles.
IX1W	IX1W-0001	Our Containers are straight sided with a weighted base. They are shipped boxed with crinkle paper and a soy information card. The large clear opening allows the wonderful, rich, strong, fragrances to fill the air when the candle is burning. When the candle is not burning, you will enjoy the subtle scent as it drifts through your room. When correctly burned (refer to our burning tips) you can expect the sides of our container candle to burn clean and clear maximizing your burn and minimizing waste.
IX1W	IX1W-0002	Our Soy Melts arrive in a gift box package of 5 (same scent). They can be used in electric or tealight powered warmers. They will fill your room with fragrance. After heating, let cool, when wax is set you will be able to easily pop the melt out of your warmer. Since soy wax is water soluble, your warmer will easily clean up with hot water & soap.
IX1W	IX1W-0003	Soy Tealights are a way to add spots of glowing light, warm melters & diffusers or create unique candle arrangements. Since soy tealights burn clean, they do not leave a black soot buildup on your specialty tealight holders.
IX1W	IX1W-0004	Our soy votive candles are shipped to you in a gift box package of 6 (same scent). Soy is a softer wax that liquifies as it burns therefore, soy votives need to be burned in a snug fitting votive holder. Since soy wax is water soluble, your votive holder will easily clean up with hot water & soap.
E5XG	E5XG-0001	These work great whether you are burning them or using an electric candle warmer.

E5XG	E5XG-0002	These work great whether you are burning them or using an electric candle warmer.
E5XG	E5XG-0003	Perfect for travel! These 4 oz Hexagon style jars are also great for stocking stuffers, gift bag or gift baskets.
E5XG	E5XG-0004	These 9 oz Hexagon style jars are the exact same candles used in our fundraising program. They are perfect if you are looking for an inexpensive yet long lasting candle.
HC8U	HC8U-0001	Our Soy candles are hand-poured using 100% soybean wax. Soybean wax candles are derived from soybean oil, the natural alternative to petroleum based candles that can induce migraine headaches and soot up your home. Soy oil is nature's renewable resource using our own Minnesota Grown Soybeans.
F26H	F26H-0001	Derived from the processing of soybeans, it is proving to be a legitimate alternative to the traditional petroleum based wax. Soy wax has several economical and burning characteristics that are very desirable. We are calling our line of soy wax container candles, which we feel is indicative of the product and geographic area that it is produced.
F2Q7	F2Q7-0001	We started with Jelly Jar candles, and have since expanded to include melts, tealights, teddy bear jars, votive holders, and a few novelty items. When making our candles, we start with 100% soy wax and add a small amount of beeswax. No other additives or dyes. We then the maximum amount of scent to create a clean burning, highly scented soy wax candle.
FHC6	FHC6-0001	Soy candles in many scents available in 5, 10, 16, or 26 oz.
ZVHA	ZVHA-0001	What could be better after a long busy day than a little self indulgence and pampering? Candles make it easy to do both. With our deliciously scented, clean burning candles, you can pamper yourself with wonderful aromas and relaxing lighting as you unwind and sink into that warm bubble bath.
C3W1	C3W1-0001	Our hand poured soy wax candles are made in small batches. We feel this is essential in providing a high quality candle to our customers. We strive to provide you with a cleaner burning soy wax candle you will enjoy from start to finish.
OV47	OV47-0001	All candles are made of soy wax and offered in a variety of scents, sizes, shapes and colors.
WA7G	WA7G-0001	The majority of candle companies use a wax that is paraffin based. The wax we found and use is called SOY. With the changing candle industry, soy candles are making a bold statement. As more and more people learn the differences between soy and paraffin candles, it is no wonder soy is gaining in popularity.

Q2HB	Q2HB-0001	These are the most fragrant candles that will provide the highest quality scent throughout the burning time of the candle. From the moment you light these candles until the flame goes out, you will enjoy your scent choice and bring you back to order more. They are the best performing, cleanest burning scented candle you will find anywhere.
Q2HB	Q2HB-0002	Travel Tin Soy Candle 6 oz.
Q2HB	Q2HB-0003	These are the most fragrant candles that will provide the highest quality scent throughout the burning time of the candle. From the moment you light these candles until the flame goes out, you will enjoy your scent choice and bring you back to order more. They are the best performing, cleanest burning scented candle you will find anywhere.
DZZ2	DZZ2-0001	Hand poured soy wax candles
LDY3	LDY3-0001	The soy pillars are unscented layered candles with three to five layers in a range of shades of a single color.
N77C	N77C-0001	The aromatic scent of vanilla beans helps calm the nerves and lift spirits.
N77C	N77C-0002	Step into the world of luxury and experience the benefits of aromatherapy with our 100% Natural Soy Wax candle with pure essential oil.
N77C	N77C-0003	The sweetly fragrant velvety white petals of gardenia offer up the intoxicating aroma of our 'special blend' ROMANCE candle.
M5X3	M5X3-0001	Our soy candles have a wonderful hot and cold scent throw

T1J3	T1J3-0006	Keepsake and votive candles along with jellies made from soy available in various sizes and scents. All of our candles are All Natural soy based and Maximum Fragranced to produce a wonderful scent for many hours. We use absolutely NO petroleum products and No Lead or Zinc wicks so the they are non-carcinogenic and toxin free. They are so pure they can be used in food preparation! Also Soy wax is water soluble so if in the event of a spill just plain water is all you need. We only use cotton wicks which provide a beautiful clean burning candle which comes in 2 different styles
T1J3	T1J3-0010	Candles made form 100% soy wax
T1J3	T1J3-0011	Keepsake and votive candles along with jellies made form soy wax

NOF7	NOF7-0001	Quality hand poured candles made from soy bean products grown by American farmers. The healthy alternative to petroleum based products - 100% NATURAL SOY WAX. Uniquely crafted 100% natural soy wax to most naturally enhance any spa or home-spa environment. Clean burning - no petrol soot to blacken walls. Environmentally safe, biodegradable. Made from renewable resource.
JEM4	JEM4-0001	Scented with fragrance oils that have been tested to make sure they fill the room with scent when burning. We have chosen the best while still carrying a variety of scents: floral, citrus, spicy, fruity...one for everyone's taste. Each batch is hand-colored to a rich, pleasing color.
HDJ8	HDJ8-0001	We started manufacturing soy wax candles. We decided to use the enamelware kettles because they make unique candle containers, and their shape allows them to be refilled. We are excited about another great use for the versatile soybean!
HDJ8	HDJ8-0002	These are perfect to use in electric melt warmers, or those that use tealights to warm them. They are great in areas where it is not possible to use a burning candle for scent- classrooms, dorm rooms, areas with small children present, etc. Use two melts at a time for a great scent experience!
HDJ8	HDJ8-0003	Perfect ambience for yourself or as a gift. Enjoy soy in pillar form
HDJ8	HDJ8-0004	These soy tealights are unscented, with an approximate burn time of 7 1/2 hours. They are made in the clear polycarbonate cups. (Keep in mind that mass-produced paraffin tealights have an approximate burn time of 3-4 hours.) Don't let the lights go out on your next party or special occasion! (picture is of 4 votives and a set of 6 tealights.)
HDJ8	HDJ8-0005	We started manufacturing soy wax candles. We decided to use the enamelware kettles because they make unique candle containers, and their shape allows them to be refilled. We are excited about another great use for the versatile soybean!
HDJ8	HDJ8-0006	A set of (6) 2 ounce votive candles of the same scent. Fill areas with twinkling light and fragrance! You may order votives in ANY scent, including essential oil blends. Also available unscented
K8WV	K8WV-0001	100% unbleached, non-chemically treated cotton wick with a hemp core on our 12 oz. container candles. A paper/cotton braided wick on our 8 oz. and votives.
CF77	CF77-0001	Our 8 oz Mason Jar candle is available in natural soy color or our standard color and scent collection. As with all of our candles, when burned properly, you can expect the wax to burn completely down the sides of the jar. All of our candles come with a decorative gold lid and attractive label.

CF77	CF77-0002	Our soy tealights offer fantastic scent in a little candle! Our tealights are available in scented and unscented. Unscented tealights come in metal holders and scented in clear holders for a stunning look.
CF77	CF77-0003	Our soy votives offer a powerful punch in a little candle! Each of our votives are highly scented and available in all of our standard scents. We recommend that all votives be burned in a tight fitting votive holder since they are not a free standing candle. Each votive is individually shrink wrapped in order to preserve scent.
D737	D737-0001	Designed to last as long as their name implies, our candles are made much differently than other candles. Surrounded by a shell of highly scented gel, a crystal votive holder and scented votive candle are embedded inside the candle. When you light the votive candle the entire candle glows, bringing added depth and life to the artwork embedded in the gel surround.
D737	D737-0002	The same great gathering of incredible fragrances as in our Collection, but available in three sizes: 16 oz., 12 oz. and 5 oz. Each jar candle in our Collection is topped by our unique rustic star lid and tied with a frayed muslin bow anchoring the Rustic Star hangtag
D737	D737-0003	Each of the 100 percent soy candles in our line features a distinctively romantic label and is topped by our unique keepsake lid filled with a rusty star cast upon a bed of real soybeans. Available in all of the scents in our Soy line, these incredible candles have an approximate 100 hour burn time.
X9W1	X9W1-0001	100% Soy Wax Candles and All Natural Aromatherapy Candles.
M96W	M96W-0001	candles made from soy wax.
H378	H378-0001	WHY YOU SHOULD BURN OUR CANDLES: Triple scented = SMELLS GREAT!; Clean burning = NO BLACK SOOT!; Cooler & slower burning = LASTS LONGER than paraffin candles; 100% cotton wicks = NO HARMFUL LEAD IN WICK!; Made from soy wax = NATURAL RENEWABLE RESOURCE; Soy wax is biodegradable = ENVIRONMENTALLY FRIENDLY!
K81L	K81L-0001	Our company is one of the select group of artisans handcrafting candles from all natural 100% soy wax.
K81L	K81L-0002	100% soy wax tarts and melts
P786	P786-0003	Designed to burn to the edge creating a glow down the middle these gems are clean burning with little or no soot, a unique treasure to be experienced. Made with pure natural palm wax and the highest grade fragrance oil on the market.
P786	P786-0006	Our all natural soy candles have a smooth, opaque finish for those who prefer a more traditional candle. Clean burning with little to no soot and all natural wick make this candle a sure winner. Our soy candles are 100% soy wax and do not contain any paraffin, beeswax or petroleum byproducts.

KCU9	KCU9-0001	Our scented candles are made exclusively for our quantity customers using a clean-burning soy-based vegetable wax and real essential oils. These 3"x6" pillar candles burn cleaner and 20% longer than same-size paraffin candles - up to 120 hours each.
B97R	B97R-0002	You will love these fragrant candles! They are handmade and hand poured. Each votive will burn 15+ hours if trimmed properly and burned in a snug-fitting candle-safe votive container. See the candle care instructions below. These candles are made with lead free wicks and 100% natural soy wax. This is non-toxic and free of petroleum and chemicals. Plus soy wax burns clean and soot free!
R165	R165-0001	We started manufacturing soy wax candles. We decided to use the enamelware kettles because they make unique candle containers, and their shape allows them to be refilled. We are excited about another great use for the versatile soybean!
R165	R165-0002	We started manufacturing soy wax candles. We decided to use the enamelware kettles because they make unique candle containers, and their shape allows them to be refilled. We are excited about another great use for the versatile soybean!
R165	R165-0003	We started manufacturing soy wax candles. We decided to use the enamelware kettles because they make unique candle containers, and their shape allows them to be refilled. We are excited about another great use for the versatile soybean!
G647	G647-0001	American soybean wax candles are made with 100% domestically grown soybeans.
G647	G647-0002	Special blend of soybeans and other natural botanicals. These candles are available in a variety of scents and sizes.
RQJ4	RQJ4-0001	As an added bonus, each one of our soy candles is environmentally friendly and hand-poured with the utmost care and attention. We look forward to making each one of your designs a reality!
RQJ4	RQJ4-0002	A wonderful way to scent any room. No wicks to trim or candles to light, these lovely bits of scented wax nicely melt down and leave behind a delicate scent of your choosing.
RQJ4	RQJ4-0003	Whether you're traveling to Timbuktu or just to your home office, these travel tins are a wonderful way to bring your favorite fragrance to any destination. We've designed these tins with the busy individual in mind. Simply pick your favorite fragrance and we'll take care of the rest!
RQJ4	RQJ4-0004	Votives are a great multi-purpose candle. Whether you would like to sample a new scent or color or decorate your living room mantel, these small but fragrant candles burn for just the right amount of time.

DH45	DH45-0004	If you're not familiar with soy wax, you should be. It is much healthier for you--typical paraffin candles release toxins and lots of that black soot that you find on your ceilings and walls. These burn cleaner, longer, and what's best--they are made from 100% USA grown soybeans. A renewable resource! Of course, per usual, we've used a lot of fragrance in these candles, so you get a great long lasting scent-sation!
B5M7	B5M7-0001	Our company is proud to introduce our collection of hand-made all natural aromatherapy grade candles. Our candles are made entirely from soywax with our certified 100% pesticide free pure essential oil blended in (enough to make the wax creamy).
C546	C546-0001	Scented All The Way Through.
Z36T	Z36T-0001	This product is 100% soy.

YJG1	YJG1-0001	These beautiful Ivory Pillar Candles are made with pure, 100% natural soybeans.	
YJG1	YJG1-0002	These candles have a delightful sweet fragrance, burn longer, cleaner, and give off more light than common paraffin candles.	
JP9I	JP9I-0002	Our soy candles are of the highest quality available. We only select the most unique and strongest fragrances to use. This allows us to not have to "overload" the wax with fragrance oil and keep a cleaner candle that still gives off an amazing scent. Our wicks are all cotton with no metal cores and are, of course, lead free.	
JP9I	JP9I-0003	Made with 100% soy wax, our votive candles are long lasting and highly scented. Available in all of the same scents as our jar line, votive candles are the perfect choice for trying out a new fragrance. When burned in a tight fighting votive candle cup, your votive will burn completely away.	
JP9I	JP9I-0004	Quickly fill a room with fragrance! These melts break apart into 6 cubes. Use 2 or 3 cubes depending on the size warmer and the size of the room to be fragranced.	
Electronic Components Cleaners	YJ3R	YJ3R-0044	Our vegetable-based product is wonderful to use in cleaning your office Computer, TV and other video equipment screens. This product does not aid in the build-up of static electricity in computer equipment.

BP37	BP37-0100	EcoClean® SILVER & GOLD CLEANER is specially engineered to safely and effectively remove oxides, grease, oils and other contamination from delicate metal contacts of silver or gold commonly incorporated in electrical and electronic equipment. Biodegradable and formulated to be free of harsh abrasives and toxic chemicals, this product is user and environmentally friendly. Additional uses include cleaning fine silver and gold jewelry, silver dining service pieces and more. Users will find this product provides superior cleaning and protecting actions and ease of use over other products of its type.
V80A	V80A-0003	ELECTRON Environmentally Preferred Dielectric Solvent is an exceptional solvent degreaser formulated without chlorinated solvents or other hazardous ingredients. The base for ELECTRON is a unique high-grade oil distillate, which provides its dielectric strength, allowing it to be used safely on all types of electrical apparatus. With its high flash point, ELECTRON provides an unprecedented degree of user safety. Product is petroleum and orange terpentine based.
YC25	YC25-0004	Citrus & Soy based Solvent Cleaner. Water Rinse-able and water-dilutable. Naturally Solvent based cleaner made from lemons and Soybeans. 100% Biodegradable product. Non-Toxic and Non-Hazardous. NO Animal Products. NO Animal Testing. ~95% Certified BioBased by the USDA BioPreferred program. Uses as cleaner for: airplanes, aerospace, circuit boards, & electronics. Highly Concentrated, Citra-Say 3 contains NO Water for both economy and for FULL Strength Cleaning.
RYB8	RYB8-0009	BIOACT SC-10E Cleaner is a fast-acting, mild odor cleaning agent developed for removing all types of solder paste, including new epoxy paste, and uncured SMD adhesives from stencils and misprinted assemblies. BIOACT SC-10E Cleaner is a specially formulated mixture of organic solvents which combines high solvency with fast evaporation relative to its high flash point (126°F, 52°C). BIOACT SC-10E Cleaner is used to remove raw solder pastes and uncured SMD adhesives from stencils and misprinted assemblies. Typical applications include: Stencil/Misprint Assembly Cleaning (Rosin solder paste, Water-soluble solder paste, No-clean solder paste, Epoxy solder paste, SMD adhesives) and Miscellaneous (Uncured encapsulants, Acrylic conformal coatings)
RYB8	RYB8-0011	BIOACT EC-7R Semi-Aqueous Defluxer is a patented blend of orange terpenes and aliphatic esters. It separates immediately from rinse water under semi-static holding conditions, allowing for easy and convenient water recycle or drain disposal.

	W64A	W64A-0003	VertecBio EL is a ethyl lactate (ethyl alpha-hydroxy propionate) solvent. It is the ester of natural (L+) produced by fermentation from corn derived feedstock. Vertec EL is a clear and colorless liquid of low volatility with a natural distinctive odor. Lactate esters have found industrial applications in specialty coatings, inks, cleaners and straight use cleaning because of their high performance and versatility. They have an excellent safety and environmental record due to their organic origin, have very low toxicities and are readily biodegradable.
	J2A9	J2A9-0001	These towels serve three purposes. First, they are pre-moistened with a special formula that neutralizes the effects of static electricity. This helps you avoid costly data loss on your computer due to static discharge. Secondly, by eliminating static electricity, less dust collects on your equipment. Your electronics will stay cleaner longer.
Floor Coverings (Non-Carpet)	JO5Q	JO5Q-0001	Cork tiles are made from natural materials and subject to shade and tone variations. They are 100% cork. The finish is a 3 coat flexible acrylic matte varnish.
	JO5Q	JO5Q-0002	Cork tiles are made from natural materials and subject to shade and tone variations. They are 100% cork. The finish is a 3 coat flexible acrylic matte varnish.
	JO5Q	JO5Q-0003	100% Natural Cork on surface and bottom layer high density (HDF) 6 mm or center layer. The finish is a 3 coat flexible acrylic matte varnish.
	JO5Q	JO5Q-0004	Rolled composition cork for sound control and underlayment. This provides thermal insulation and is resistant to moisture and easy to install.
	TX4M	TX4M-0001	One of the strongest floors on the market, this bamboo flooring is designed by weaving bamboo fibers together and using extreme pressure creating flooring of high density and durability. This woven bamboo qualifies for up to 2 LEED credits and has a Janka rating of 3944 lbf. The sleek look created upon installation combined with the tremendous durability of the flooring make this flooring perfect for both commercial and residential installations.
	OB6F	OB6F-0003	Featuring 7 dynamic colors with subtle accents that coordinate with our portfolio of flooring solution, this delivers the design punch you are looking for. Lower cost install method with our patented seaming system and color coordinated solid weld rods are available to offer seaming choices based on installation and space requirements. This is certified for low VOC emissions compliant to California Section 1350 with third-party certification and LEED eligibility. Now available with a coating product to protect your linoleum investment.

OB6F	OB6F-0004	Graphic black and white graining with the look of natural granite, now with our special coating, make this an excellent choice for those high profile areas where the look of natural materials is a must. Lower cost install method with our patented seaming system and color coordinated solid weld rods are available to offer seaming choices based on installation and space requirements. This certified for low VOC emissions compliant to California Section 1350 with third-party certification and LEED eligibility.
OB6F	OB6F-0005	The aggressive pattern along with extra durability makes this a perfect choice for industrial and heavy traffic areas. Available in 3 colors and one heavy-duty gauge, this helps conceal traffic patterns and coordinates with our portfolio of flooring solutions. This is FloorScore certified for low VOC emissions compliant to California Section 1350 with third-party certification and LEED eligibility.
OB6F	OB6F-0006	Available in 12 colors This is a bold blend of highlights and contrasts that coordinate with our portfolio of flooring solutions. Lower cost install method with our patented seaming system and color coordinated solid weld rods are available to offer seaming choices based on installation and space requirements. This is FloorScore certified for low VOC emissions compliant to California Section 1350 with third-party certification and LEED eligibility. Now available with our special coating to protect your linoleum investment.
OB6F	OB6F-0007	With over 50 classic, sophisticated colors, this delivers almost endless possibilities for creative and sustainable design. The marbled palette coordinates with our portfolio flooring solutions. Lower cost install method with our patented seaming system and color coordinated solid weld rods are available to offer seaming choices based on installation and space requirements. This is FloorScore certified for low VOC emissions compliant to California Section 1350 with third-party certification and LEED eligibility.
OB6F	OB6F-0001	A flooring product made with patent-pending material that contains biobased, rapidly renewable ingredients. This unique plant-based composition reduces the reliance on petroleum and fossil fuels.
OB6F	OB6F-0008	This solid color linoleum is great for creating borders, accents, insets and custom effects, you can choose from 6 colors for that one-of-a-kind interior. Lower cost install method with our patented seaming system and color coordinated solid weld rods are available to offer seaming choices based on installation and space requirements. This is FloorScore certified for low VOC emissions compliant to California Section 1350 with third party certification and LEED eligibility.

XII2	XII2-0002	Covers a 2.21 sq. m. has a pre-finished matt with 6 coats of UV protection. Also comes with a 25 year structural guarantee.
XII2	XII2-0001	Covers a 2.21 sq. m. has a pre-finished matt with 6 coats of UV protection. Also comes with a 25 year structural guarantee.
XII2	XII2-0003	Strand woven bamboo is twice as hard as normal bamboo flooring. The finish is a pre-finished matt with 6 coats of UV protection.
X113	X113-0026	Our cork flooring comes in 5 different styles. Cork provides naturally resilient and amazingly comfortable cushion for foot traffic, reducing noise as well.
P1RV	P1RV-0036	Cork flooring products are made from all natural raw materials; offering the resilience and excellent performance of cork as an insulator, while providing amazing decorative possibilities. Cork Floors offer a very attractive range of designs, which are the result of marketing research and testing to obtain the highest quality construction and decorative appeal for floors in residential or light to medium commercial applications for the US market. Our decorative styles create a warm environment, both contemporary and unique that achieves maximum comfort and insulation from noise. Cork plank is the simplest way of installing a cork floor. A hard and stable core board utilizes the precise UNICLIC tongue and groove joint guarantees rapid installation without overlaps. The high density cork used as a top wear layer as well as the cork backing provides insulation and other advantageous features to cork floors. Cork in the latest stylish colors sets a naturally fashionable note in your rooms.
P1RV	P1RV-0061	Cork flooring uses the material extracted from the bark of the cork oak tree, which only grows in the forests of Mediterranean countries. The largest concentration of cork flooring plantations are found in Spain and Portugal. The bark, which becomes the cork flooring, was designed by Mother Nature to protect the tree during its average 500-year lifespan. Not only is the bark inherently fire resistant to temperature changes prevailing in those regions, to more than 38 species of insects, including the termite, and to the development of microbes. It is important to note that only the bark is peeled off to be used for cork flooring every decade. The tree itself is never felled. The bark is a vegetal tissue made by an agglomeration of dead cells filled with air and lined with alternating layers of cellulose and waxy substance called suberin. Hence the cork oak tree scientific name: Quercus Suber. By using cork, we keep the forest alive and the habitat undisturbed.

P1RV	P1RV-0004	<p>Botanically, bamboo is not a wood at all , but rather a grass. Bamboo is attractive as a building material because it is hard, strong, and dimensionally stable. Environmentally, it's hard to argue with a wood substitute that matures in 4-5 years, re-generates without the need for replanting, and requires no fertilization or pesticides. Bamboo hardwood flooring is designed and manufactured in two configurations; flat pressed and side pressed. The strips used in each configuration are precision milled to a .5 centimeter thickness to insure an optimum balance of forces in the finished board. To insure dimensional stability, this material is precision milled with tongue and groove on the sides as well as the ends. The flat-pressed (horizontal) style of flooring presents as quite visually "open" with the nodes appearing as randomly placed delicate brush strokes. The side pressed (vertical) flooring is more dense in appearance, some would say less delicate. The choice is a matter of style with consumer interest in each type being about equal.</p>
P1RV	P1RV-0042	<p>Cork flooring products are made from all natural raw materials; offering the resilience and excellent performance of cork as an insulator, while providing amazing decorative possibilities. Cork Floors offer a very attractive range of designs, which are the result of marketing research and testing to obtain the highest quality construction and decorative appeal for floors in residential or light to medium commercial applications for the US market. Our decorative styles create a warm environment, both contemporary and unique that achieves maximum comfort and insulation from noise. Cork plank is the simplest way of installing a cork floor. A hard and stable core board utilizes the precise UNICLIC tongue and groove joint guarantees rapid installation without overlaps. The high density cork used as a top wear layer as well as the cork backing provides insulation and other advantageous features to cork floors. Cork in the latest stylish colors sets a naturally fashionable note in your rooms.</p>

P1RV	P1RV-0063	<p>Cork flooring uses the material extracted from the bark of the cork oak tree, which only grows in the forests of Mediterranean countries. The largest concentration of cork flooring plantations are found in Spain and Portugal. The bark, which becomes the cork flooring, was designed by Mother Nature to protect the tree during its average 500-year lifespan. Not only is the bark inherently fire resistant to temperature changes prevailing in those regions, to more than 38 species of insects, including the termite, and to the development of microbes. It is important to note that only the bark is peeled off to be used for cork flooring every decade. The tree itself is never felled. The bark is a vegetal tissue made by an agglomeration of dead cells filled with air and lined with alternating layers of cellulose and waxy substance called suberin. Hence the cork oak tree scientific name: Quercus Suber. By using cork, we keep the forest alive and the habitat undisturbed.</p>
P1RV	P1RV-0066	<p>All natural composition of: wood and cork flour, linseed oil, natural pine resins, and pigments. Back in style for home décor & design because it's eco-friendly, made from natural products; antibacterial; biodegradable; naturally fire retardant; emits no harmful pollutants; warm and comfortable under foot.</p>

P1RV	P1RV-0003	<p>Botanically, bamboo is not a wood at all , but rather a grass. Bamboo is attractive as a building material because it is hard, strong, and dimensionally stable. Environmentally, it's hard to argue with a wood substitute that matures in 4-5 years, re-generates without the need for replanting, and requires no fertilization or pesticides. Bamboo hardwood flooring is designed and manufactured in two configurations; flat pressed and side pressed. The strips used in each configuration are precision milled to a .5 centimeter thickness to insure an optimum balance of forces in the finished board. To insure dimensional stability, this material is precision milled with tongue and groove on the sides as well as the ends. The flat-pressed (horizontal) style of flooring presents as quite visually "open" with the nodes appearing as randomly placed delicate brush strokes. The side pressed (vertical) flooring is more dense in appearance, some would say less delicate. The choice is a matter of style with consumer interest in each type being about equal.</p>

S377	S377-0010	Our cork flooring comes right from the famous cork producing regions in Portugal, delivering the decorative and functional benefits you're looking for in premium flooring. For natural warmth and sound insulation, a comfortable walking experience, and rich colors and patterns that get attention, our cork flooring is a unique statement. Our Cork is an environment-friendly flooring produced from a fully renewable resource. Cork flooring is manufactured using cork harvested without harming the cork oak and from by-products of wine cork production. Cork flooring is resilient, quiet, and easy to install. Our Cork is manufactured with an integral cork underlay for easy installation. Natural Cork Flooring is characterized by small, consistent granules of cork. Classic and Burled also feature a premium glueless locking system. Classic Cork Flooring contains a wide variety of granule sizes in a random pattern. Burled Cork Floors display a mottled appearance with a great deal of "movement" in the design, similar to a burled walnut or maple pattern.
S377	S377-0007	10 year bamboo flooring is strictly A Grade flooring finished with 6 coats of satin finish UV cured urethane with aluminum oxide. An additional coat of finish is applied to the underside of the flooring to improve moisture resistance. Our superior lamination process produces the most lasting and durable bamboo flooring structure available. Our bamboo flooring meets some of the strictest standards and carries a lifetime structural and 10 year finish warranty.
S377	S377-0006	Our economy grade bamboo flooring is finished with 6 coats of satin finish UV cured urethane with aluminum oxide. An additional coat of finish is applied to the underside of the flooring to improve moisture resistance. Our superior lamination process produces the most lasting and durable bamboo flooring structure available. Our bamboo flooring meets some of the strictest standards and carries a 10 year finish warranty.
S377	S377-0002	Our economy grade bamboo flooring is finished with 6 coats of satin finish UV cured urethane with aluminum oxide. An additional coat of finish is applied to the underside of the flooring to improve moisture resistance. Our superior lamination process produces the most lasting and durable bamboo flooring structure available. Our bamboo flooring meets some of the strictest standards and carries a 10 year finish warranty.

S377	S377-0005	Our engineered bamboo flooring is strictly A Grade flooring and is finished with 6 coats of semi-gloss finish, scratch resistant, UV cured aluminum oxide urethane. Our superior lamination process produces the most lasting and durable engineered bamboo flooring structure available. Our bamboo flooring meets some of the strictest standards and carries a lifetime structural and 25 year finish warranty. This beautiful, long-lasting bamboo flooring is low maintenance and easy to install due to the glueless lock system. It is perfect for installation above or below grade, or over radiant heat flooring.
S377	S377-0001	Our Handscraped 25 year bamboo flooring is strictly Premium Select Grade flooring, which is above standard A Grade, and is finished with 6 coats of semi-gloss finish, scratch resistant, UV cured aluminum oxide urethane. The genuine handscraped surface provides a warm rustic appearance. An additional coat of finish is applied to the underside of the flooring to improve moisture resistance. Our superior lamination process produces the most lasting and durable bamboo flooring structure available. Our bamboo flooring meets some of the strictest standards and carries a lifetime structural and 25 year finish warranty.
S377	S377-0008	Our 25 year bamboo flooring is strictly Premium Select Grade flooring, which is above standard A Grade, and is finished with 6 coats of semi-gloss finish, scratch resistant, UV cured aluminum oxide urethane. An additional coat of finish is applied to the underside of the flooring to improve moisture resistance. Our superior lamination process produces the most lasting and durable bamboo flooring structure available. Our bamboo flooring meets some of the strictest standards and carries a lifetime structural and 25 year finish warranty.
S377	S377-0009	Our 25 year bamboo flooring is strictly Premium Select Grade flooring, which is above standard A Grade, and is finished with 6 coats of semi-gloss finish, scratch resistant, UV cured aluminum oxide urethane. An additional coat of finish is applied to the underside of the flooring to improve moisture resistance. Our superior lamination process produces the most lasting and durable bamboo flooring structure available. Our bamboo flooring meets some of the strictest standards and carries a lifetime structural and 25 year finish warranty.

S377	S377-0003	Strand woven bamboo is produced by weaving long strips of bamboo together then binding them under incredible pressure. This produces a floor that is even harder and denser than traditional bamboo flooring, with a grain more similar to hardwood flooring. Our Strand Woven bamboo flooring is strictly A Grade and is finished with 6 coats of semi-gloss finish, scratch resistant, UV cured aluminum oxide urethane. An additional coat of finish is applied to the underside of the flooring to improve moisture resistance. Our bamboo flooring meets some of the strictest standards and carries a lifetime structural and 25 year finish warranty for residential applications and 10 years for commercial applications.

RGQ4	RGQ4-0002	This is a visually striking, highly textured linoleum floor covering. Its carpet-like marbleization easily hides daily dirt in corridors, lobbies and cafeterias.
RGQ4	RGQ4-0015	Borders & Corners are exceptionally precise, water-jet cut, made-to-order design elements that can be used to add unique custom features to your floor design. Choose your individual color palette in any of the standard configurations. Once a request form is filled out and the product is ordered, standard delivery is within 4-6 weeks. Minimum order is 1 linear meter of border or 1 corner.
RGQ4	RGQ4-0013	"Today's architects increasingly select materials and colors to emphasise a spatial experience whereby light and reflections are used suggestively. This colourful greys match this development perfectly. The designs appear subtle - at first all one sees is grey - but on closer inspection a marvel of color opens up. Our range offers architects and designers a wide choice of innovative flooring solutions for use in commercial, domestic and institutional interiors. In line with this tradition, we worked closely with the Dutch artist Peter Struycken to produce a new collection of designs based on his intriguing color concept of combining colors which turn to grey when mixed together. Our advanced Topshield finish protects against scuff marks and the build-up of dirt."

RGQ4	RGQ4-0003	Bringing the floor covering market the innovative “natural” balance between cost and quality, Contractor Plus is a comprehensive program offering alternative flooring solutions to the “value conscious” customer. This product has long been synonymous with high quality, high design resilient flooring applications. available in 36 colors of sheet and 18 colors of tile.
RGQ4	RGQ4-0014	Natural, bacteriostatic linoleum floorcovering with a polyester backing for dimensional stability and a polyolefin layer for sound insulation and comfort. Its finish provides improved maintenance and long-term appearance retention.
RGQ4	RGQ4-0005	This dual tile offers 31 rich color patterns in an easily installed, incredibly durable polyester backed 20" x 20" tile.
RGQ4	RGQ4-0012	A range of floorings developed by twelve Dutch designers. The twelve designers were granted complete artistic freedom. Their inspiration was very personal: a favourite color, a shade with a great future or a color missing from the current ranges. The result is 12 unique colorings, 12 designs each telling their own story. This product range is available in a thickness of 2.5mm with matching welding rods available for all designs. It is protected with the unique finish. Thanks to this finish, each color keeps its natural beauty, just as the designer intended.
RGQ4	RGQ4-0001	This Excel Tile is a new and innovative breakthrough in tile floor covering. It is composed of linseed oil, rosin binders, wood flour and reinforced with a polyester interlayer for dimensional stability. Excel Tile is flexible for installation ease yet durable for outstanding facility performance. Excel Tile will provide an environmental solution as well as a durable floor covering solution. It is both cost effective in installation and maintenance. It’s installed with a solvent free adhesive and has an approximate installed cost of \$3.25-\$3.75 per square foot. If dry maintenance methods are utilized a savings of up to 60% or more can be attained as well as a dramatic reduction in environmental pollution versus stripping and recoating most resilient floor coverings.
RGQ4	RGQ4-0006	With its subtle, refined marbling, this has an extremely harmonious surface. Its delicate light, soft hues and subtle colour contrasts evoke Renaissance frescos. Its tone-on-tone shades perfectly match the materials and clean lines used in modern architecture.
RGQ4	RGQ4-0011	This is a timeless classic inspired by black and white lithography, etching and block printing. The Graphic range is a classic whose inspiration and impact lie in its simplicity. The designs and colors stand for purity and create a sense of timelessness that is as versatile as it is striking. Graphic’s contrasting blacks and whites and subtle shades of grey combine excellently with all kinds of building materials.

RGQ4	RGQ4-0010	Mineral consists of easily understood designs that combine well with all kinds of interiors and which every decision-maker will feel comfortable with. Mineral's quiet, neutral patterns complement any space. They create a pleasing background or context that makes every interior shine.
RGQ4	RGQ4-0008	This new design satisfies the demand for a linoleum with a non-marbled structure. When installed it looks almost solid-colored. Its natural look combines well with natural materials. The 12 colors form a subdued palette so that, whatever the combination, they remain harmonious.
RGQ4	RGQ4-0009	This is a one-of-a-kind: a floor covering whose colors and pattern combinations have been designed to enhance each other perfectly. Its non-organic, rhythmic patterns contrast beautifully with the accompanying range of quiet designs, creating stunning combinations in every situation.
RGQ4	RGQ4-0004	This product has been a mainstay floor covering for over 100 years because it is one of the few products made from primarily natural raw materials. It is made up of linseed oil, rosins, and wood flour, calendered onto a natural jute backing (backing for tile is polyester). It is a tough yet visually striking floor covering, highly resistant to heavy rolling loads and foot traffic. Because it is a natural organic product, its performance is enhanced by time, as exposure to air serves to harden and increase its durability. Although it continues to harden over time, the floor remains quiet and comfortable under foot.
RGQ4	RGQ4-0016	Our retro-yet-modern design adds an extra dimension to large, tall and open spaces.
RGQ4	RGQ4-0007	This spectacular array of eight-color marbleization is unique to linoleum. The color spectrum of the designs is chosen in such a way that the surface blends into a quiet symphonic ensemble. Our colorful patterns perfectly match a wide variety of surroundings and materials. Multi-color and solid welding rods are available for all colors of Vivace.
RGQ4	RGQ4-0017	This is a perfect complement to our other floor coverings, bringing a subtle something extra to every interior.
RGQ4	RGQ4-0019	This truly is something exceptional. The special embossing not only looks and feels exclusive, it also plays with the light and provides a distinctive texture.
RGQ4	RGQ4-0018	This consists of a choice of six solid tones that create a simple, pure, industrial appearance.
E46M	E46M-0002	Bamboo hardwood flooring is designed and manufactured in two configurations; flat pressed and side pressed. The strips used in each configuration are precision milled to a .5 centimeter thickness to insure an optimum balance of forces in the finished board.
E46M	E46M-0003	We have 30 finishes for our 12"x7/16"x36" planks. They have a tongue-n-groove or click-lock glueless installation.

E46M	E46M-0001	Bamboo hardwood flooring is designed and manufactured in two configurations; flat pressed and side pressed. The strips used in each configuration are precision milled to a .5 centimeter thickness to insure an optimum balance of forces in the finished board.
P119	P119-0001	By adding acrylic, we made bamboo as durable as it is beautiful. By adding color, we made it adaptable to just about any décor. Our flooring is impregnated using methylmethacrylate monomer (liquid plastic) and is then polymerized throughout the thickness of the wear layer by a proprietary process. The thickness of the wood face veneer is 1/10" (nominal) and is processed for hardness (PSI) and durability (scratch and abrasion resistance). The 1/10" wear layer is bonded to a multi-ply hardwood substrate. Flooring shall be 2 2/3" or 4" (wide) x 3/8" (thickness) x 12" — 47" (random lengths) installed and finished in accordance with instructions and adhesives.
AQ7Y	AQ7Y-0007	Cork underlayment is a natural choice for commercial, industrial and residential use or for wherever resilience is important. Cork is a natural acoustic insulation material that is resilient to heavy usage. The cellular structure of this naturally harvested and renewable material has made it the most well-known and efficient insulator for acoustics, heat and mechanical vibration. Our natural cork underlayment helps insulate sounds. This environmentally friendly and durable performer is a natural for underlays. Cork underlayment does its duty under dance floors, in gyms, offices, hospitals and homes. Even if you don't want a certain floor to have the look of cork, you still have the feel of cork.
AQ7Y	AQ7Y-0004	The best cork tiles comes from the Dodge family tree. For decades the Dodge family has provided the finest in cork products. A fan favorite of designers and architects everywhere, "Dodge Cork" tile is still offering the same clean and simple pattern after 80 years, available in two shades, medium and light, and two finishes - polyurethane matte or waxed. Of course, you can keep it even more natural, in its "unfinished" form, as well. This cork tile naturally warms and enriches any interior. It is used on floors, walls and ceilings for a quiet, warm and comfortable feeling. Offered in several shades and finishes of familiar honey tones, these tiles can also be stained for a unique custom color appearance. Highly abrasion resistant, this cork tile has proven to withstand decades of high traffic in notable public buildings, such as schools, hospitals, shops, offices, museums, libraries, hotels and restaurants. For commercial or residential interiors, the natural aesthetics, durability and resilience of one hundred percent non-laminated cork make this cork tile the perfect solution for almost any interior floor covering area!

AQ7Y	AQ7Y-0001	Classic, traditional cork flooring is one of the most natural and elegant flooring materials available. Cork, as a natural product, warms and enriches any interior. Cork flooring provides a comfortable and durable alternative to other floor coverings.
AQ7Y	AQ7Y-0002	These colorful, cork tiles are as versatile as your imagination. You can design a floor with a dramatically different look, yet retain all the benefits of a cork floor.
AQ7Y	AQ7Y-0003	This is a collection of natural cork tiles. The collection offers environmentally friendly floor in sophisticated designs.
AQ7Y	AQ7Y-0006	Resilient, hypoallergenic, acoustically sound, environmentally friendly and beautiful. This is a luxurious collection of floating floor planks.
AQ7Y	AQ7Y-0005	Perfect for spaces requiring a tough core and a beautiful skin. Our natural cork planks are trendy and fashionable and provide comfort and warmth underfoot.
PTA0	PTA0-0003	Standard planks are 11 13/16" x 35 13/16" and 7/16" thick. Center fiberboard provides the click lock system. Must be ordered by the carton, approximately 18sf per carton (6 planks). Our floating cork floors are now available in all the same colors as the glue-down tiles.
PTA0	PTA0-0002	Pick the style and select your colours. Cork inlays are offered in 36 inch lengths: Pre-assembled, pre-glued and pre-finished - just like our glue-down tiles. Simply glue the strip down on your subfloor.
PTA0	PTA0-0001	One of the unique features of our tiles is the variety of tile shapes and sizes. Any of our colours can be made into many tile shapes and sizes. We've got more than 40 unique colours and are always developing more.
W0B8	W0B8-0016	Our cork flooring is available in tongue-and-groove planks and glue-down tiles. The cork is responsibly harvested every 9 years by a time-honored method that does not harm the health of the tree. Cork is warm, quiet, comfortable and resilient, and naturally resistant to pests and mold. Comes with a factory-applied, acrylic-urethane matte protective finish. Multiple styles. Easy to install and maintain.
W0B8	W0B8-0017	Our floors are made from responsibly harvested hardwoods certified by the Forest Stewardship Council. Available in multiple styles: solid, engineered, prefinished, unfinished, exotic, domestic and bamboo. All of our are assembled using low-VOC adhesives and meet the E1 and 2012 CARB standards for indoor air quality. Coordinating molding and installation accessories available.

W0B8	W0B8-0018	This material is made from natural raw materials including linseed oil (from flax seeds), pine rosins, wood flour (finely ground sawdust), and ecologically-friendly pigments that contain no heavy metals such as lead or cadmium. This is a natural organic product whose performance is enhanced over time as a result of the continued oxidation of linseed oil, a process which makes it naturally durable and anti-microbial. This is anti-static--an ideal choice for allergy and asthma sufferers. It is installed with solvent-free adhesives and finished with a durable, water-based primer and top layer that shields against dirt and scuffing. Warm, quiet, and easy on the feet. Easy to clean with a damp mop. Resistant to heavy rolling loads and foot traffic. Produced in manufacturing facilities that are ISO 14001 certified for good environmental management.
W0B8	W0B8-0020	This bamboo flooring is a durable, low-maintenance alternative to wood floors. Bamboo is a highly renewable resource that may be harvested only 4-6 years after being planted. It is tougher and denser than most hardwoods: harder than maple and more resistant than oak to changes in temperature and moisture, making it ideal for damp settings. This Bamboo comes in three styles: horizontal grain, vertical grain, and strand woven. Horizontal grain bamboo flooring displays a distinctive geometric pattern formed by the joints in the bamboo stalk, while vertical-grain bamboo has a clean, linear look with no visible joints. Strand woven bamboo displays an organic, feathery grain that is similar to that of traditional wood flooring. Installs and cleans like wood. Made from bamboo grown specifically for use by the construction industry. Finished with 7 coats of anti-abrasive aluminum oxide. Coordinating molding available.
V2XC	V2XC-0006	Our cork tiles are of the most environmentally sound choice for flooring and wall covering available today. Direct from the largest concentration of cork harvests in Spain and Portugal, our Cork Tiles are available in a glue down tile size 12"x12"x3/16" thick and an array of unique styles. An economical option for an eco-friendly floor or wall project.
V2XC	V2XC-0001	Our cork product is the forward-looking green material and like all cork products. It is a renewable resource. Literally recycled from the cork stopper industry's by-product and then fashioned into sheeps from circular patterns, reminiscent of "penny" ceramic tile. Like most of our cork products, It insulates and is water resistant, making it perfect for bathroom floors & walls, kitchens, children's rooms, music rooms, libraries & dens.
V2XC	V2XC-0004	Yes that's right! This panel is now being offered in our broad range of custom cork colors. This is a flooring system that can be installed over an existing level floor and has a clueless snap-lock floating floor system.

V2XC	V2XC-0002	These Cork Tiles are an innovative approach to creativity in cork flooring. Unique and distinct, its rich, transparent colour palette, ranging from subtle to bold, with a wide scheme of various patterns and sizes is not matched by anyone. The result is an elegant selection of a naturally harvested product, an environmentally sound choice. A beautiful cork floor is good for your health as well as planet Earth. With all this in mind, we have rendered cork more accessible for a broader range of uses. With its great thermal and acoustical insulative properties, our cork tiles are suitable for floors, walls, or ceilings. Our coloured cork tiles are available for shipping worldwide.
V2XC	V2XC-0003	This is a cork product with click system tongue and groove and is installed as a floating floor system (no adhesive) and come pre-varnished in over styles and colors.
N56G	N56G-0019	Our Cork is known worldwide for top-of-the-line quality cork floors, and as one of the leading cork providers in North America. Its products are popular for both commercial and residential applications, as flooring or raw materials in making floors. Cork has been used by the flooring industry since the turn of the century. N56G	N56G-0001	Bamboo, the new product for the millenium, is a naturally beautiful and durable alternative to our limited global supply of hardwood. Strong, long-lasting, and beautiful, bamboo will add style and distinction to your home. Botanically, bamboo is not a wood at all, but rather a grass. And like grass, it has a short growth cycle of approximately five years, depending on the variety. As a result, bamboo is considered a highly renewable and sustainable product that saves our ever dwindling hardwood forest.
N56G	N56G-0030	We are one of the woodworking industry's biggest manufacturers of ready-to-assemble drawers, ceilings, decorative walls and flooring. Two gigantic facilities in New York and Virginia allow us to enjoy its wide distribution nationwide, and meet the demands of its discerning clientele. Our products are all about remarkable performance, variety and innovation. we offers customers nothing but the best flooring line in the market, with special considerations to durability, usability, and beauty. Through the moderna Flooring Systems, we present to the market laminate, cork and hardwood flooring that feature the proprietary joint system. We offer simple, fast, glueless installation and easy maintenance. These quality features make this flooring perfect for residential and light commercial applications. The 100% cork surface layer is UV acrylic finished and provides significant acoustic insulation.

N56G	N56G-0003	Our Bamboo has harnessed this beauty and elegantly crafted it for your home. These bamboo floors offer distinct grains that provide a unique look and complements any decor. These beautiful floors can easily add a touch of character to any room. Additionally, the matte finish gives it a high-end sophisticated look without the high-end price.

N56G	N56G-0031	Cork tiles for floors and walls provide warm, comfortable and durable alternatives to traditional coverings. Cork is highly abrasion-resistant, resists humidity and dampens sound, making it an ideal choice for both residential and commercial uses. In the home, cork tiles can be easily installed in most parts of the house. It's natural resistance to humidity and non-slip surface makes cork especially suitable for kitchens, as it is a luxurious and long-lasting alternative for living rooms and bedrooms. Cork is also frequently used as an underlayment for other types of flooring like hardwood and laminate floors.
N56G	N56G-0032	Cork tiles for floors and walls provide warm, comfortable and durable alternatives to traditional coverings. Cork is highly abrasion-resistant, resists humidity and dampens sound, making it an ideal choice for both residential and commercial uses. Cork is also frequently used as an underlayment for other types of flooring like hardwood and laminate floors.

N56G	N56G-0005	<p>Highly flexible and resilient, bamboo is actually stronger than some of the most common wood flooring species. It has a Janka hardness rating higher than that of maple and nearly double that of red oak. Other than bamboo's high durability factor, it is also highly resilient and can withstand greater impacts than most hardwoods without denting. Bamboo is also known for its unique dimensional stability and moisture resistance, with the latter allowing for less gapping, cupping, or warping due to weather changes. This quality also makes bamboo flooring very suitable in areas like half baths and kitchens where hardwood flooring is usually not recommended. As a plus, bamboo's natural resistance to moisture also means that it is resistant to spills and stains.</p>
N56G	N56G-0008	<p>These bamboo floors are unique floors for unique people. Available in a wide variety of patterns and designer colors, these one-of-a-kind floors have been brought to the North American shores by the leader of bamboo flooring in Asia. We have divided its products into two major categories: hand-scraped and stained. Each hand-scraped board is painstakingly crafted by master artisans, ensuring that no two boards are identical. As no machines were used in the sculpting process, this floor is offered in limited quantities. Conceivably less than 1/100 of 1 percent of the population will have the opportunity to own this floor.</p>
N56G	N56G-0006	<p>With our bamboo flooring, you can re-live the time of the Ming Dynasty when artistic carving and design was at its peak form. The bevels and curves flow smoothly throughout each plank. This unique texture is created by actual Chinese sculpting artists, many of whom have been carving floors for generations.</p>

N56G	N56G-0011	Bamboo is fast becoming the most stylish alternative to traditional flooring materials - and it's a practical and an ecologically responsible choice. Even though it can be used like timber, bamboo is actually a grass that functions as a single plant. Bamboo is not harmed by harvesting and like grass it has a short growth cycle of approximately five years. Bamboo is attractive as a building material because it is very hard, strong, and more dimensionally stable (less expansion and contraction) than many commonly used wood flooring options, including oak and maple.
N56G	N56G-0009	Bamboo is fast becoming the most stylish alternative to traditional flooring materials - and it's a practical and an ecologically responsible choice. Even though it can be used like timber, bamboo is actually a grass that functions as a single plant. Bamboo is not harmed by harvesting and like grass it has a short growth cycle of approximately five years. Bamboo is attractive as a building material because it is very hard, strong, and more dimensionally stable (less expansion and contraction) than many commonly used wood flooring options, including oak and maple.

WS3I	WS3I-0001	<p>Our premium 'A' grade Bamboo flooring is available in vertical and horizontal grain and in natural or carbonized colors in each style. Bamboo reaches harvestable maturity in seven years, versus the 30+ years required of most hardwoods. To further ensure the green focus of this product the adhesives used in the production of this product are VOC and formaldehyde free. Our Bamboo is 3/4" thick, significantly thicker than most competitors products and is finished with a high wearing aluminum oxide finish. We offer a 25-year residential warranty (5-year commercial) on the flooring and the finish. A volume discount of 10% is available for flooring purchases of \$7,000 or more. Samples are available for \$10 including shipping, the cost of samples will be credited against your future flooring order.</p>
WS3I	WS3I-0002	<p>This product captures the current trend for dark plank flooring. At the same time it is an excellent choice for the environmentally concious consumer. This material is a plantation grown species that regrows from the stump in a period of approximately 17 years, less than half the time needed for most other hardwoods. This product is available in 3", 4", and 5" widths and lengths from 1' to 7'. The flooing is prefinished and carries a 25-year warranty and a lifetime structural warranty. We offer a 10% discount on flooring orders of \$7,000 or more. Samples are available for \$10 including shipping, the samples include 2-3 pieces of flooring. Sample purchases will be credited against your future flooring purchase.</p>
WS3I	WS3I-0003	<p>This material is a plantation grown hardwood species that takes only 17-years to reach maturity, less than half the time required for most hardwood species. It is a dense hardwood (25% harder than Red Oak) and is exceptionally stable, making it an ideal species for use in flooring. We offer unfinished Lyptus in 3", 4", and 5" planks. Flooring is square edged and can be finished onsite with stains, which it takes exceptionally well, or simply sealed and finish with clear polyurethane. We also offer this product in another color. We offers a 10% discount for orders of \$7,000 or more. Samples are available for \$10 and include 2-3 pieces of flooring, the cost of samples will be credited against your futurue flooring purchase. Please note, this material is extremely popular and we are currently working with 3-4 week lead times, please schedule your order accordingly.</p>

OG7Q	OG7Q-0003	<p>Homogenous Linoleum floorcovering, single layer on Polyester backingfor reduced maintenance. Our linoleum is made from 75% rapidly renewable materials. It's beauty you can feel good about. We use wood and cork flour, limestone and linseed oil. Nothing unpronounceable. Or harmful to the environment. It's the new feel-good flooring, aesthetically, environmentally and economically. Because our linoleum is so durable and easy to maintain, its life cycle cost are extremely low. Our tough xf finish provides the industry's best surface protection. It requires no initial wax or polish and can save up to 30% on maintenance and 50% on water, detergents and energy over its lifetime. Plus you can count on our linoleum to be resistant to stains, chemicals and abrasions. It's also naturally quieter, more resilient and fire retardant. And our linoleum is a homogenous product, so the color and pattern goes all the way through the flooring. Which means even in extremely high traffic areas, even over years and years of use, you won't see wear patterns.</p>

GYQX	GYQX-0001	Bamboo is the dream green product which improves man's dwellings as it saves the Earth. It defines "sustainability." It grows very rapidly ... under 3 years, though we harvest after 5 (for greater stability). Bamboo is an efficient carbon dioxide sequestering sink, converts 8 times more carbon dioxide to oxygen than trees and returns large quantities nitrogen to the soil. Its rapid growth insures soil stabilization. It will replace hardwood as the building material of choice. Ecologically, there is none better. It is considered by most as the ultimate building material. Our bamboo flooring is available in vertical natural, vertical carbonized, horizontal natural, and horizontal carbonized.
SS62	SS62-0001	It is no accident. Instead, it's the product of 100% dedication to the resource itself. We have always been dedicated to Proper Forest Management and to providing a sustainable, renewable supply of forest products available for future generations. The manifestation of this ongoing Environmental Commitment is a line of flooring for which we have 100% PURE certification from the Forest Stewardship Council, lasting testimony to our never-ending dedication to the Planet and the Resources upon which we rely.

EA5D	EA5D-0001	"Product innovations like this have made hardwood floor installation a do-it-yourself dream. With hardwood flooring, you have several different installation options depending on the hardwood you buy: Glueless, Nail Down, or Glue Down. Glueless flooring system allows your new hardwood flooring to be installed quickly and without glue. It's the most do-it-yourself friendly hardwood installation you could find. There's no messy clean up, and you can walk on it right away. This product is made possible by a patented locking technology that reliably secures your flooring panels on all four sides without adhesive. As an added bonus, this floor can be easily taken apart and reassembled."

1570	1570-0011	<p>These floors, now available in pre-finished adhesive-free lock together, 12"x36"x1/2 nominal planks. No ordinary floor. The new Generation in naturalist flooring. Whether you like it classic or contemporary or perhaps somewhere in between, this palette has the look to satisfy nearly any interior theme. Cork is the environmental choice for flooring, cork renews after it is harvested from the tree. When harvested correctly, the Cork Oak tree is left completely unharmed in the harvesting process. The naturalist look and feel of this cork will provides a perfect complement to your interior. This offers more value for your investment. Now available in larger pre-finished floor panels, each one with a precision milled glueless joint system. Easier, not to mention more economical installations are now possible with the pre-attached cork silencing under-lay, a standard option with floating floor planks. Thanks to the remarkably high sound insulating capabilities cork possesses, calm silence enters your home. Enjoy our no wax finish for durable ease of maintenance generation after generation.</p>
1570	1570-0008	<p>Each plank sustainably and artfully created to endure the test of time in your home for generations to come. With so many artistic elements exuding quiet glamour, the design possibilities are countless. Express yourself, mix and match with color options available in both hand inserted square peg and non peg versions. This limited hand made collection gathers inspiration from rich history and responsible living. Three unique distressing techniques transform rigid surface lines into warm and familiar touches of the past. Individually hand stained/buffed planks present the sumptuous earth tones available only from this artist inspired collection. Dramatically proportioned planks at 7 7/16" wide x 74" in length provide a floorscape of texture. Artful attention to detail creates the rich aesthetic, the selection of regenerative materials minimizes environmental impact.</p>
1570	1570-0009	<p>Individual hand forming makes every authentic hand scraped plank unique. Using centuries-old techniques as a starting point, Artisans recreate the charm and ambience of hand-crafted, custom made flooring into this line. This authentic, physically handscraped flooring combines old-world beauty with today's advanced finishing processes for durable carefree performance.</p>
1570	1570-0006	<p>We've translated the welcoming style of our finest bamboo into a floor that is so simple to install, it might just tempt you to accept the challenge of installation yourself. Introducing this bamboo floor from our line featuring a glueless, locking tongue and groove system for simple installation. This floor installs quickly and with less effort than any other floating wood floor design to date.</p>

I570	I570-0007	We've translated the welcoming style of our finest bamboo into a floor that is so simple to install, it might just tempt you to accept the challenge of installation yourself. This collection is now available in an expanded array of colors. Introducing this bamboo floor from our line featuring a precision milled 4-sided tongue and groove system for simple installation. Glue, nail, staple, or float, this floor installs quickly and with less effort than any other floating wood floor design to date. Light hues of handrubbed stain reveal the undertone of the soft inviting shapes of the horizontal bamboo grain.
I570	I570-0005	Wider plank, versatile installation. Solid bamboo floor at its finest. We've translated the welcoming style of our finest bamboo into a floor that is elegantly contemporary and luxuriously modern. Introducing this solid bamboo floor from our line featuring wider and longer planks with precision-milled tongue and groove and four-sided micro bevel. Glue, nail, or float, this floor installs quickly and with less effort than any other solid wood floor to date.
I570	I570-0001	Today a growing worldwide awareness toward conservation and the use of regenerative building products is underway. Bamboo has recently been named the green building material for the 21st century. It's easy to understand the responsibility of conservation as the hardwoods of Brazil and the Amazon forests deplete at an alarming pace. While the maturation time for the common oak species is 60 years, the large moso bamboo takes only 6 years to achieve full maturation. The original bamboo plant is left unharmed in the harvesting process and quickly regrows for yet another harvest.
I570	I570-0002	Today a growing worldwide awareness toward conservation and the use of regenerative building products is underway. Bamboo has recently been named the green building material for the 21st century. It's easy to understand the responsibility of conservation as the hardwoods of Brazil and the Amazon forests deplete at an alarming pace. While the maturation time for the common oak species is 60 years, the large moso bamboo takes only 6 years to achieve full maturation. The original bamboo plant is left unharmed in the harvesting process and quickly regrows for yet another harvest.

I570	I570-0003	<p>Our Finest Bamboo is now available in an expanded array of colors. Richly hued floors are the simplest way to bring subtle color to the home. Light hues of handrubbed stain reveal the undertone of the soft inviting shapes of the horizontal bamboo grain. Boards in the horizontal grain become a striking decorative element, both visually appealing and comfortable. The horizontal grain is well suited for rooms where relaxing and entertaining demand equal time. Whether an experienced decorator or a beginner, these color palettes give you the tools you need to find and achieve your own personal style.</p>
I570	I570-0010	<p>Formal to contemporary, multiple coats of high gloss finish create the durable yet crystal clear sheen of this collection. High gloss furnishings are one of the most recent movements in interior design. High gloss finishes create a clean crisp environment. Combine with either natural lighting or artificial lighting in your home reawakens both the contemporary and formal feel of your interior oasis.</p>
I570	I570-0004	<p>Commercial Grade, Residentially selected. Made of 100% Bamboo for healthy living. Strand woven bamboo: fresh style with extensive design adaptability. These flooring planks are so densely rated (3000 PSI Janka hardness), they are uniquely suited for the wear requirements of Commercial settings yet beautiful enough to adorn the finest homes. Touting the density of the hardest exotic species, this is Green building at its best. With Strand woven, Bamboo Strips are thrashed, woven, bundled and pressed into a dense compact block. The block is then sliced into exceptional 6' long flooring planks. The long style planks are milled with an exact fitting 4 sided tongue and groove and then finished to create an exceptional floor with stunning visual appeal. A slight micro-bevel edge gives definition to each plank. This entire process gives this flooring its crisp appearance and rugged durability. It can be cut, installed, and sanded like conventional hardwood flooring options. Due in part to its inherent dimensional stability, it can be glued directly down over concrete. Our company exclusively uses adhesives for the construction of the woven planks. Dyno is free of components classified as hazardous to the environment. There are no solvents, heavy metals, bactericides, or halogenated organic components.</p>

N8ZP	N8ZP-0001	Our palmwood flooring is made from multiple layers of palm, creating both a stable and durable flooring product of great beauty. These tongue and groove planks come in lengths from two to six feet in length and are provided as unfinished or prefinished flooring. It can be installed by either a nail-down or glue-down method following procedures laid out by NOFMA, National Oak Floor Manufacturer's Association, and the NWFA, National Wood Flooring Association. Comes in Prefinished, Unfinished, as well as in an Edge Grain or Flat Grain. Also comes in an ebony or walnut stain.
WRYV	WRYV-0016	Certified wood is wood that has been harvested and milled in accordance with FSC standards, requiring a third party to audit all aspects of production, including harvesting, milling and final sale. This is the most stringent and costly of the certification systems. Many smaller lumber and timber mills cannot afford such high marketing expenses and can therefore do not achieve "FSC" certification, despite some mills sustainable practices are in accordance with those guidelines. It is also important to understand that "Sustainable woods" also encompass lesser known species that may historically have less commercial appeal. By giving these species economic value in the forest land and harvesting equation, the overall forest has more value, which helps ensure that forests are not replaced with short-sighted mono-crops like soy.
WRYV	WRYV-0011	Certified wood is wood that has been harvested and milled in accordance with FSC standards, requiring a third party to audit all aspects of production, including harvesting, milling and final sale. This is the most stringent and costly of the certification systems. WRYV	WRYV-0006	<p>The newest and most durable bamboo product. This bamboo is considered the most stable natural wood known for flooring, and one of the hardest woods known to exist (over twice as hard as oak, and 50% harder than Brazilian Cherry). This bamboo is made by compressing "strands" of the bamboo fibers under intense pressure, while using a heat-sensitive low-VOC adhesive. It is extremely exotic and rich looking - through the "woven" process, the consistency found in the "traditional" bamboo styles is completely removed.</p>
WRYV	WRYV-0008	<p>Bamboo is a sustainable resource. Bamboo flooring is made from quick growing bamboo stalks, found throughout most of southeast Asia. Bamboo grows to a height of 60' within the first several months of growth, and thereafter is harvested every 5-6 years. It is cut into strips, and then laminated into flooring planks. Bamboo floors offer tremendous interior design flexibility. Bamboo is unique and beautiful, and a great alternative to other hardwoods.</p>

TKF5	TKF5-0003	These wide-plank bamboo flooring complements a variety of décor styles from traditional to contemporary. The wider, longer planks are especially pleasing in larger rooms, install more quickly and may be floated below grade. Cross-fillet construction adds stability. The 5-coat German finish includes a wear layer of abrasion-resistant aluminum oxide plus two scratch-resistant, polyurethane topcoats that protect the bamboo fiber's natural strength and beauty, so choose this wide plank for a great room or studio. Our finish is water-based and solvent-free, and its manufacturing adhesives emit less formaldehyde than is present in ambient air.
TKF5	TKF5-0002	With these products, deep, nuanced stain colors come into play without sacrificing the subtle look of flat grain and nodes. Now your beautiful bamboo floor can be a rich counterpoint or a smart complement to the fabrics, hues and textures in any room. The 5-coat German finish includes a layer of abrasion-resistant aluminum oxide plus two scratch-resistant, polyurethane topcoats to protect the bamboo's natural strength and toughness, so choose our product for a dramatic entry or cozy den. And don't worry about the environment, because the finish is water-based and solvent-free, and the manufacturing adhesives emit less formaldehyde than is present in ambient air.
TKF5	TKF5-0001	The quiet beauty of this bamboo flooring lends simple elegance to living rooms, dining rooms and foyers in a variety of décor styles from traditional to contemporary. The 5-coat German finish includes a wear layer of abrasion-resistant aluminum oxide and two scratch-resistant, polyurethane topcoats that protect the bamboo fiber's natural strength and beauty. So choose this for a teenager's bedroom or a busy kitchen. And don't worry about the environment, because the finish is water-based and solvent-free, and the manufacturing adhesives emit less formaldehyde than is present in ambient air.
TKF5	TKF5-0005	This is designed for the builder or consumer who wants the look of a consistent pattern made of three-foot long planks. The 5-coat German finish includes a layer of abrasion-resistant aluminum oxide plus two scratch-resistant, polyurethane topcoats to protect the bamboo's natural strength and toughness. The finish is water-based and solvent-free, and the manufacturing adhesives emit less formaldehyde than is present in ambient air.

TKF5	TKF5-0010	These wider, longer, square-edged planks install quickly and complement a variety of décor styles from traditional to contemporary. This line features a patented, glueless, self-locking system that allows the floating floor to be installed on, above or below grade. New patents-pending construction uses a cross-ply bamboo core to ensure that the flooring remains flat and the locking system profile strong and stable. A hidden benefit: the recommended underlayment is also an acoustical sound barrier, making this ideal for high-rise condominiums or offices as well as residential installations. The 7-coat German finish includes a wear layer of abrasion-resistant aluminum oxide plus two scratch-resistant, polyurethane topcoats that protect the bamboo fiber's natural strength and beauty. Finish is water-based and solvent-free, and the manufacturing adhesives emit less formaldehyde than is present in ambient air.
TKF5	TKF5-0004	This strand bamboo solid strip flooring is manufactured under a patented process that fuses bamboo fibers with an environmentally safe adhesive under extreme pressure to form homogenous, high-density blocks that are sliced and milled into flooring planks. As a result, it is 100 percent harder than red oak and 18 percent harder than fine mahogany, making it perfect for high-traffic areas in both residential and commercial settings. This strand bamboo flooring is available in four distinctive blends of bamboo strands and a new blend, a beautiful blend of natural and caramelized strands. The 5-coat German finish includes a wear layer of abrasion-resistant aluminum oxide plus two scratch-resistant, polyurethane topcoats that protect the bamboo fiber's natural strength and beauty. Its finish is water-based and solvent-free, and its adhesives emit substantially less formaldehyde than is present in ambient air.
RUJQ	RUJQ-0004	This company introduces the newest innovation in bamboo flooring. Observation is manufactured from long, slender strands of Mau Shu bamboo, the hardest of all tall grass species, for extra strength and durability. Observation possesses higher density hardness and rigidity for use in high traffic, and extreme performance-demanding flooring areas.
RUJQ	RUJQ-0003	A handsome array of cork flooring, which is setting new standards for both performance and aesthetics utilizing eco-friendly flooring solutions. Unicork floors are unique, quiet, comfortable, and environmentally sensitive. This is manufactured from the bark of cork trees without destroying the trees. This flooring is a natural thermal insulator and has excellent resilience with inherent sound absorbing qualities.

RUJQ	RUJQ-0002	A handsome array of metallic-colored corkflooring, which is setting new standards for both performance and aesthetics utilizing eco-friendly flooring solutions. Our floors are unique, quiet, comfortable, and environmentally sensitive. This is manufactured from the bark of cork trees without destroyin the trees. This flooring is a natural thermal insulator and has excellent resilience with inherent sound absorbing qualities.
RUJQ	RUJQ-0001	A handsome array of uniquely-styled cork flooring, which is setting new standards for both performance and aesthetics utilizing eco-friendly flooring solutions. This is manufactured from the bark of cork trees without destroyin the trees. This flooring is a natural thermal insulator and has excellent resilience with inherent sound absorbing qualities.
Y15I	Y15I-0001	This centuries-old product combines elegance, versatility, form and function. And, natural cork is now offered as the perfect flooring solution for you. Unique grains provide looks that can't be found with other flooring products. The beautiful hues are not painted, but rather are inherent to the product. As with any natural product, the color and shade variations add to the beauty of the finished floor. The demand for Bamboo has been expanding for many years because of its beauty and elegance. Bamboo is now one of the preferred materials for interior designers. Trend-setting and aesthetically pleasing, Bamboo combines hard wearing capabilities and ecological considerations. Bamboo presents an unmistakably high quality surface appearance.
Y15I	Y15I-0002	More and more businesses and homeowners seeking a unique, environmentally conscious look for their surroundings are turning to cork flooring. Cork improves air quality, since it cannot absorb or release dust into the air. Cork "bounces back" – increasing comfort and reducing fatigue. And, cork is environmentally friendly. Cork is a unique natural product with characteristics unmatched by any other material. The bark consists of two hundred million closed air cells per cubic inch. These cells give cork resilience, durability, moisture resistance, and thermal and acoustic insulation. A century of use has proven cork to be a durable and beautiful flooring option. And now, with improved technologies, we've made it the perfect environmentally conscious choice for any room in your home. Pre-finished planks com ready-to-install with a patented "CLIC" together tongue and groove edge – no glues or nails required. Cork contains a natural wax-like substance called Suberin, which makes it impervious to liquid and gases, and seals it against bacterial growth. Suberin is a natural insect repellent.

1487	1487-0006	This product is available to you in bundles with the nails in it, job-site direct at a very favorable pricing. Alternatively, we can process the material prior to delivery, removing the nails and providing a hand sanded surface appearance. It is generally 3/4"x 2-1/4' or 3/4"x 3-1/4" Oak, Pecan, or Maple flooring. Once the nails are pulled and the T&G cleaned, the floor installs very easily. The inventory on this stock changes frequently.	
LYTI	LYTI-0001	Our superior quality cork floor tiles consist of various sizes of cork granules compressed together with special binders under very high pressure ensuring that they will withstand the intensive wear of a floor covering. A cork floor not only offers natural charm but also provides great comfort to the feet and legs. It creates a very quiet space and provides a much appreciated insulation for both cold and warm climates. Unlike most modern floor coverings our cork floors can be refinished to look like new, anytime.	
LYTI	LYTI-0004	We bring you the next generation in fine cork flooring: A timeless look...An enduring value...And now the natural beauty of cork is even easier to install. Our Floating Floors are a system of cork panels which can be installed virtually anywhere without any of the intensive labor required to install other types of flooring materials. Tough enough to stand up to even the heaviest of foot traffic, our Floating Floors require little maintenance and will last for years. It is perfect for residential and commercial applications.	
LYTI	LYTI-0006	This corkboard was invented in 1892 mainly for the purpose of insulating cold storage areas in buildings and other locations requiring efficient insulation. It consists of various sizes of cork granules compressed together under a high temperature causing the granules to expand and giving them a dark brown color. In past decades corkboard has also been used as a decorative item for walls and ceilings. It has the additional property of improving an area's insulation and sound proofing. We also have available a special grade of corkboard which is ideal for the manufacturing of decorative and hunting decoys.	
Foot Care Products	RDK2	RDK2-0021	Contains Cocoa Butter, Virgin Olive Oil, Sweet Almond Oil, Vitamin E Oil, Corn Starch, Cera Alba (Aloe Vera)
	RDK2	RDK2-0017	Contains Sea Salt, Epsom Salt, Vitamin E Oil

VW38	VW38-0008	Wonderful blend of natural minerals to soothe and comfort aching, tired feet. We include magnesium sulfate to help reduce swelling and inflammation, tea tree and peppermint essential oils to deodorize and freshen your feet, and menthol and wintergreen oils to stimulate circulation.
B22Y	B22Y-0004	Survive the dry winter and sandal seasons with our enriched, softening creme.
B22Y	B22Y-0007	The blend of shea butter and almond oil.
Z334	Z334-0009	Pamper tired, sore feet with this luscious skin-softening shea butter treatment with antibacterial tea tree, soothing lavender, and refreshing peppermint. For best results, massage onto feet and leave on overnight.
Z334	Z334-0010	NEW! A vegan version with Cocoa-Shea Butter 'Marshmallows' to provide nourishing, skin softening effects.
QBAL	QBAL-0018	Treat yourself to a revitalizing foot massage with Healingscents Organic Foot Cream. This luxurious cream is made with an herbal infusion of Certified Organic Peppermint, Chamomile, Elder and Lavender Flowers.

RZZ3	RZZ3-0010	You've crossed the finish line. Now there's one more thing left to conquer – aching feet. Get a leg up with this product. It's all-naturally moisturizing, restorative and relaxing. Just add a small handful of crystals to warm water. You'll melt the miles away and forget all about the agony of the feet.
K4S3	K4S3-0006	Allows you to sit down and relax and nurture your feet
G22U	G22U-0004	Tread softly and step lightly with smooth, spearminty feet after giving your self a good scrub with our new, green, minty bar. It's a multi-purpose, multi-tasking clever little thing which revives tired feet with spearmint and peppermint, soothes them with marigold essential oils, takes off dead skin with ground pumice stone and moisturises them with cocoa butter and shea butter. Use it in the bath or shower or run yourself a bowl of warm water and use the bar to give your wet feet a massage and pumice scrub. Be sure to give your feet a really good rinse to get rid of the bits of pumice they can get stuck under your toe rings and be bothersome and because the natural butters can make your feet slippery. When you're quite finished you'll feel as though someone younger has lent you their feet.
BLP5	BLP5-0004	With real pumice to help remove rough dry spots and slough calluses and other nasties away. And with a special blend of fantastically refreshing feet-friendly essential oils to cool them down, wake them up, soothe them right, and leave them left... with a breath of sorely needed relief.
BLP5	BLP5-0003	Already soaked and scrubbed? Finish the pampering off with a rich blend of moisturizing oils prepared especially to massage your tired aching feet. An all natural, non-greasy formula delivered in a handy treatment pump. With the exclusive essential oil blend.
BLP5	BLP5-0005	With an added blend of essential oils made just for spoiling and reviving those toasted tootsies. For maximum effectiveness and enjoyment, pat dry and follow with this product. Rinse and finish off.
XY8K	XY8K-0004	For tired and burning feet the Cooling Peppermint variety of our foot creme is by far our best seller. A special blend of essential oils including peppermint, spearmint, eucalyptus, and menthol can be used to calm and soothe your aching feet. We have found that these essential oils are the most beneficial for helping those tired tootsies.
W2DK	W2DK-0007	This is a heavy duty healing foot balm that is splendid for healing sores, eliminating fungus or tending to dry cracked heels. My clients with diabetes love this balm to give their feet that extra attention they need. It contains 4 skin healing herbs of echinacea, st johns wort, calendula and oregon grape root infused into sunflower oil and then blended with avocado oil, shea butter and vitamin E.

OOFW	OOFW-0004	Moisturizing Jojoba is the base of this thick cream, excellent for massaging into feet before bedtime. The perfect blend of Ginger and Lemongrass Essential Oils provide a fresh, clean scent while the Ginger warms the skin.
NF90	NF90-0029	A thick creme with superior glide that uses the anti-microbial properties of tea tree oil to sanitize the foot. Fragranced with natural eucalyptus and peppermint oils for a refreshing aroma.
NF90	NF90-0030	Natural Italian pumice and healing extracts of aloe, chamomile, white willow bark and Yakima Valley peppermint are combined to exfoliate the skin while refreshing and scrubbing the feet.
AMR1	AMR1-0002	Ingredients include mustard powder and essential oils of rosemary, eucalyptus, and peppermint. Feels great on tired feet!
HNG5	HNG5-0038	Soften dry, calloused skin with this rich, emollient moisturizer formulated specifically for your feet. Soothing tea tree and peppermint oils revive tired toes.
HNG5	HNG5-0039	Massage and exfoliate tired feet with the crushed apricot-seed and walnut-shell powders in this invigorating foot polish. Essential oils of peppermint and tea tree add a refreshing scent.
IO85	IO85-0002	The perfect treat for tired feet! Peppermint and Bulgarian Lavender essential oils along with Menthol will make your feet tingle.
EE48	EE48-0011	Treat your feet. Soak in this wonderfully aromatic blend of salts, dried flowers and herbs. Follow-up with our peppermint foot cream. If diabetic, please check with your doctor before using any type of foot soak.
EE48	EE48-0008	This works best for really dry, scaly feet. We can't make medical claims, but we do have a lot of satisfied, diabetic customers and their doctors.
WG58	WG58-0008	A vanishing cream that moisturizes and protects dry cracked skin. It contains natural oils, Comfrey Extract, and Melaleuca oil. Comfrey extracts soothes inflamed tissue and stimulates healing, while Melaleuca oil is a natural antiseptic. The natural oils penetrate the skin rapidly and leave no greasy residue. This is a superb product for cracked skin, "itchy" feet, and slow healing sores. Suggested Uses: Dry cracked skin, athlete's foot, other skin irritations.
FL62	FL62-0011	This foot cream is sure to leave your feet feeling soft, smooth, and refreshed. 4 ounces.
U42A	U42A-0005	Moisturizes rough feet and soothes them when they are tired and achy. This feels great at the end of the day. If you have never had a foot massage....try it, it really does work to relax the muscles and it feels real good!

	EZZ2	EZZ2-0006	Our feet struggle daily to keep up with our hectic lives, and, sadly, many look like they need some extra tender loving care. If your tired tootsies are dry, sore, cracked, rough, or just feeling tired, you need to try our heel thysel foot scrub! A wonderfully penetrating oil blend, mineral-rich Pacific sea salts, and the healing properties of Eucalyptus oil and Tea Tree oil create unbelievably smooth and soft results. If your feet could use some extra love, keep a jar by the tub, sit, scoop, scrub, and rinse away roughness. Use at least 3 times a week for best results.
	BOPR	BOPR-0001	The Tea Tree and Eucalyptus Oils have anti-fungal properties, while the Mint and Rosemary are also anti-bacterial. Nice fragrance! So Foot Balm is ideally suited for soothing, smoothing and healing your dry, sore, tired, hard working, hard walking feet.
Furniture Cleaners and Protectors	A9PY	A9PY-0020	Liquid, machine-compatible natural wax for wooden surfaces, especially parquet floors, cork and floor tiles that have been pretreated systematically. Exclusively made from natural raw materials.
	A9PY	A9PY-0021	Water thinnable wax emulsion for cleaning and regular care of oiled and waxed surfaces. Also for use as a furniture polish. Exclusively made from natural raw materials.
	A9PY	A9PY-0027	Solvent-free varnish for wood refinement indoors. Especially for furniture, floorboards and toys. Further treatment with wax. Exclusively made from natural raw materials.
	A43G	A43G-0001	A pure mineral citrus oil for many industrial and commercial applications. Oil is clear to reduce chances of stains. It is great for coating cutting tables to improve material handling.
	Q14G	Q14G-0022	a rich collection of bee and plant waxes in a transparent, easy to use paste. Enhanced durability, protection and luster of interior wood, cork and more. Use after applications of other products if desired. Buff to a silky matte finish. Use on floors, furniture, cabinets, paneling, & more.
	Q14G	Q14G-0023	a rich collection of bee and plant waxes in a transparent, easy to use paste. Larch tree resin is also used to enhance durability, protection and luster of interior wood, cork and more. Use after applications of other products. May be used as a solo primary treatment with heat application. Buff to a silky or satin gloss finish. Use on furniture, cabinets, paneling, & more.
	Q14G	Q14G-0032	Solvent-free garden furniture oil for hardwood garden furniture, also suitable for pressure-treated softwoods
	Q14G	Q14G-0040	Water-thinnable emulsion containing wax, for ongoing care especially of floors. Good cleaning power and a pleasant odor.
	Q14G	Q14G-0042	Polish containing wax and alcohol. Removes casual dust and dirt build-up. Enhances the wax finish with a new polished lustre. Cembra oil repels insects (moths, etc.)

XB9O	XB9O-0013	Treat your wood surfaces - floors, paneling, cabinets, furniture, and more - to the cleaning power of lemon oil. The resulting shine will please your eyes, and the soft, lemony scent of citrus will please your nose (and your guests' noses, too!).
FVT2	FVT2-0007	A ready-to-use Polish for use on all wood, veneer and laminate surfaces.
KB96	KB96-0007	We blended together Lemon Balm, Carnauba Wax, Beeswax, Jojoba Oil, and Vinegar to create a lovely rich wood moisturizer, cleanser and dusting aid. Use a small dab of cream with a dry clean cloth, and rub your wood furniture in oval hand motions to create a rich, soft luster.
FCM9	FCM9-0006	Our furniture polish contains absolutely no petroleum distillates! Real orange oils and plant extractives protect and replenish wood and leave behind a beautiful luster. 8-ounce pump spray bottle.
TA8E	TA8E-0008	It is a furniture conditioner that cleans and puts oil back into wood. Usually better on natural wood. Its composition is predominantly soy and orange. 100% natural. Biodegradable.
TA8E	TA8E-0015	A non-toxic creamy emulsion that cleans, polishes, protects and restores hard surfaces in only one application. The hard sheen allows the natural beauty of the surface to shine through. Surfaces treated with this will resist resoiling and fingerprints longer than conventional polishes.
JOXA	JOXA-0004	Adds life to dried out surfaces and covers minute scratches. Nourishes and moisturizes fine wood furniture. Imparts a durable gloss to all finishes as you dust. Pleasant lemon scent.
D54E	D54E-0001	A warm, honey brown wax particularly suitable for oak, walnut and all darker woods.
D54E	D54E-0013	Suitable for all wooden furniture, whatever the color, and results in a deep shine.
U2GG	U2GG-0001	All Natural Beeswax and Lavendar polish renews, moisturizes and protects fine furniture and cabinetry.
TPHG	TPHG-0031	Our polish is made from natural olive and orange oils. It cleans and beautifies wood, formica, particle board and vinyl surfaces.
X4H4	X4H4-0001	It gently cleans water-soluble grime like food on a dining table, as well as oil-based dirt like grease on kitchen cabinets. The natural polishing oils enrich the patina and beautify furniture, antiques, cabinets, and all wood finishes. Available in lavender-bergamot, sandalwood-tangerine, and vanilla-patchouli scents.
X4H4	X4H4-0002	We developed a natural Wood Preserver that combines beeswax, Brazilian carnauba wax and vegetable-derived ingredients with essential oils. The natural oils and waxes protect and enhance the beauty of all types of finished and unfinished woods. We highly recommend choosing the same essential oil blend to follow up our Wood Cleaner and Polish. Available in lavender-bergamot, sandalwood-tangerine, and vanilla-patchouli scents.

W7UT	W7UT-0017	For interior wood surfaces. Not suitable for kitchen counter tops, floors or stairs.
OT17	OT17-0028	Here's a clever little formula: wood for good. It even rhymes. This no-wax formula contains gentle, cleansing conditioner that brings your wood back to life without leaving residue or buildup. And, it leaves a fresh almond scent in its wake. And that's good for wood.
OT17	OT17-0029	Here's a clever little formula: wood for good. It even rhymes. This no-wax formula contains gentle, cleansing conditioner that brings your wood back to life without leaving residue or buildup. And, it leaves a fresh almond scent in its wake. And that's good for wood.
LC8H	LC8H-0010	Furniture Cream is fantastic for caring for your wood furniture. Simply dab the cream on a clean, soft, natural cloth and use gentle, oval motions along the grain. Wipe off any dust and you're done! Available in lavender and lemon verbena.
CZ8C	CZ8C-0005	A natural orange oil and soy oil product that cleans and shines wood and other household surfaces without the use of petroleum distillates, dyes or other toxic ingredients like other infomercial advertised polishes contain. It hides minor wood scratches and water marks. It repels fingerprints. This product removes wax buildup. It removes soap build up and helps prevent future build up. It smells like fresh oranges. This product is Purely and Simply...100% NATURAL.
L6BX	L6BX-0020	Oil and petroleum free cleaner leaves a diamond-hard sheen while removing fingerprints, stains and smudges.
CC3Z	CC3Z-0002	Wood flax soap with linseed oil to clean and condition wood and other line surfaces. Contains potassium cocoate, cocamide DEA, linseed oil, potassium tallowate and water.
CC3Z	CC3Z-0009	Pine oil disinfectant. More pine oil power! Contains isopropyl alcohol, potassium tallowate, pine oil and water.
C9PX	C9PX-0015	A non-toxic creamy emulsion that cleans, polishes, protects and restores hard surfaces in only one application. Furniture Polish, Stainless Steel Cleaner/Polish, Automotive Protector.

I61E	I61E-0005	This all natural cleaning product is one of our favorites! Contains vinegar to help get rid of dirt and a combination of oils and waxes to treat your wood furniture right! Buffs to a glowing shine. Also available in unscented. No harsh chemicals, just the right amount of nutrients to help preserve and protect all types of wood surfaces. Gentle enough to use every time you clean. Available in scented and unscented. Product contains filtered water, vinegar, cream base {vegetable oils, beeswax (secretion of honey bees), stearic acid (derived from soybeans), emulsifying wax (vegetable based), liquid germall plus (preservative), borax (sodium borate, a mineral salt), and xanthan gum (derived from corn sugar)} polysorbate 20 (derived from sorbitol, which is found in berries and fruits), a blend of pure essential oils if scented.	
PZA8	PZA8-0002	Liquid beeswax for water-repellent surface upgrading of wood, cork, etc. Apply after a thin coat of primer (No. 124, 127 or 117)	
PZA8	PZA8-0003	Ointment of beeswax and plant waxes for water repellent upgrading of wooden surfaces, especially for floors. Provides velvety, pleasant-to-touch surface. Improves room climate. Apply one thin coat of floor sealer/primer (No. 127), then one coat of wax) on unfinished wooden floors, Finally add the wax and buff out after 3-6 hours.	
H35A	H35A-0007	Revitalize your wood furnishings with this product. This natural concentration of Applying Wood Food directly to wood suffering from mold, dryness, or neglect will make you both feel good!oils, mixed with vinegar, will have you and your fine wood furnishings celebrating.	
DH45	DH45-0001	We've chosen the hardest of natural waxes, carnauba, and made a concoction that nourishes your fine wood furniture and leaves it with a beautiful, protective sheen. Simply rub the furniture wax on your furniture, let it set for a minute, and buff it with a soft cloth.	
Inks - Specialty	CT27	CT27-0001	This line was developed as a low VOC (less than 3%) high solids system. The flushes contain a limited amount of linseed alkyd. This unique product line exhibits excellent gloss and set speeds. Our line allows ink makers to formulate high viscosit, low yield value finished inks commonly associated with imported ink systems. We offer the ink maker the flexibility to formulate high solid systems, work and turn, dry offset and inks for various substrates depending on the letdown vehicles employed

CT27	CT27-0002	This line was developed as a low VOC (less than 3%) high solids system. The flushes contain a limited amount of linseed alkyd. This unique product line exhibits excellent gloss and set speeds equal to conventional Quickset Flushes. The line allows ink makers to formulate high viscosit, low yield value finished inks commonly associated with imported ink systems. It offers the ink maker the flexibility to formulate high solid systems, work and turn, dry offset and inks for various substrates depending on the letdown vehicles employed
CT27	CT27-0003	This line was developed as a low VOC (less than 3%) high solids system. The flushes contain a limited amount of linseed alkyd. This unique product line exhibits excellent gloss and set speeds. The line allows ink makers to formulate high viscosit, low yield value finished inks commonly associated with imported ink systems. It offers the ink maker the flexibility to formulate high solid systems, work and turn, dry offset and inks for various substrates depending on the letdown vehicles employed
CT27	CT27-0004	This line was developed as a low VOC (less than 3%) high solids system. The flushes contain a limited amount of linseed alkyd. This unique product line exhibits excellent gloss and set speeds. The Aries line allows ink makers to formulate high viscosit, low yield value finished inks commonly associated with imported ink systems. It offers the ink maker the flexibility to formulate high solid systems, work and turn, dry offset and inks for various substrates depending on the letdown vehicles employed
CT27	CT27-0005	This line was developed as a low VOC (less than 3%) high solids system. The flushes contain a limited amount of linseed alkyd. BIXA	BIXA-0001	Next-generation environmentally-friendly solvent inks are made with a renewable resource – corn. It is the only solvent ink recognized by the U.S. Environmental Protection Agency (EPA). The inks provide all the benefits of traditional solvent inks. It bonds to uncoated substrates, resists mechanical wear and UV light, achieves the same high print quality while also being durable.
W35H	W35H-0003	Vegetable oil-based ink system that is environmentally friendly and offers 20 percent to 30 percent reduction of VOCs.

A3N2	A3N2-0002	Prints sharper and denser with faster drying, improved rub resistance and reduced linting. Contains less than 1 percent VOCs.
A3N2	A3N2-0004	Specially formulated to provide greater density while exhibiting less than 1 percent VOCs. Provides excellent gloss, rub resistance and dot reproduction, and exhibits faster set speeds than conventional soy black inks.
A3N2	A3N2-0005	These inks have been formulated for excellent transfer in the high speed rotary offset arena. Far from a simple forms ink, because of its exceptional transfer capacity it will allow the web printer to achieve brighter colors, denser blacks and sharper screen tints with far less solid ink density. Our unique soy based vehicle will achieve a harder finish for better scuff resistance than conventional forms inks. This series is considered finishing friendly in every way, including laser compatibility.
A3N2	A3N2-0011	For printers who want to set themselves apart from the crowd, this formulation is an environmentally friendly low VOC process inkset that actually runs great on press! NU-CENTURA LOW VOC process inks incorporate a proprietary, renewable soy vehicle technology and emit less than 3% VOC's by weight. However, the advantages don't stop there. NU-CENTURA sets very fast on a wide variety of substrates, has very good gloss and dries harder than any other quick-set ink on the market today.
TXQN	TXQN-0001	Designed to complement our other product line of press-ready heatset inks in a soy oil-based heatset vehicle, the product line is available in black and process colors and can be specially ordered in Warm Red and Reflex Blue. Inks are a reduced-VOC version of our world-famous high performance heatset inks. Inks contain at least 7% soy oil, directly replacing petroleum distillates. This means that by using our printers will be polluting less because there are now 7 to 10% less VOC's in the ink. Inks can be ordered in custom shades in quantities of at least 400 lbs. per color, blacks at least 900 to 1800 lbs. Inks are formulated in such a way that they can be substituted for inks with very few problems. Black has all of the superior transfer, drying, gloss, trap, and blue tone of the Blacks. Process Colors have the high strength, good gloss, rub and scratch resistance, drying, transfer and press stability of most non-soy oil-based heatset inks. Remember, when you buy our product, you really are doing something positive for the environment! Black and Colors are available in medium and low tacks, which encompass the greatest majority of heatset printing applications.

Thermasoy inks can be ordered in custom shades in quantities of at least 400 lbs. per color, blacks at least 900 to 1800 lbs. Thermasoy inks are formulated in such a way that they can be substituted for Nova inks with very few problems. Thermasoy Black has all of the superior transfer, drying, gloss, trap, and blue tone of the Nova Blacks. Thermasoy Process Colors have the high strength, good gloss, rub and scratch resistance, drying, transfer and press stability of most non-soy oil-based heatset inks. Remember, when you buy Thermasoy, you really are doing something positive for the environment! Thermasoy Black and Colors are available in medium and low tacks, which encompass the greatest majority of heatset printing applications.</p>
TXQN	TXQN-0005	<p>Soytab Black is a 100% solids, soy oil-based news black. Soytab Black is a low-tack, low viscosity newsink designed for high speed web offset presses, and it must be used on absorbent news stocks. Due to its very high oil content, Soytab Black can be used with any newsprint stock and will deliver very good resistance to linting. Along with other non-volatile oils, Soytab Black contains at least 11% soybean oil. Soytab is available in two varieties: regular Soytab Black and a "Special Order" item, Soytab "SB" Black, which has a gelled body for better pressside handling.</p>
TXQN	TXQN-0006	<p>Along with Soytab Black, a complete line of process and mixing colors is offered. And when you order at least 400 lbs. per color, we can offer you some of our many popular custom shades as well. All the Soytab Colors contain 20&endash;25% soybean oil, and most have no more than 7% VOC content. Soytab Colors are clean and bright, guaranteeing satisfaction in such critical areas as the printing of delicate process shades and fleshtones. Additionally, Soytab Colors deliver very good rub resistance soon after impression because they have a high resin content. Soytab Colors are also unique in the fact that they are based on the "Soytab Extender" system. In the manufacture of Soytab Colors, only two main ingredients are used: a flushed pigment and our Soytab Extender vehicle. The Soytab Extender vehicle is what makes Soytab Colors what they are, since Soytab Extender is a 100% solids, soy oil-based gel with low tack, neutral color, and a great gelled body. We like Soytab Colors so much, we've made them our standard newsink colors!</p>

TXQN	TXQN-0007	Our most popular news colors! Soytab 2 PMX PLUS Series Soy oil-based news colors make Soytab colors cleaner and stronger than ever! Unlike the other Soytab news colors, PMX PLUS colors are based on the world's most popular color standard. There are nine base mixing colors in the Soytab PMX PLUS Series that can be easily used in conjunction with the popular Color Selector Guide to produce hundreds of clean, brilliant news colors! Soytab 2 PMX PLUS colors are also high in solids, which is good for the environment. The Soytab 2 PMX PLUS Series comes in these basic colors...Process Blue, Phthalo Green, Rubine Red/Process Red, Rhodamine Red, Process Yellow, Purple, Reflex Blue, Violet, and Warm Red.	
DV0Z	DV0Z-0001	Process inks formulated with high vegetable oil content and low VOC's. Contains a high percentage of vegetable oil (5% VOC's and more than 30% vegetable oil).	
TRVB	TRVB-0001	A low-rub soy alternative for newspapers and commercial printers, delivering better than 60 percent improvement in rub reduction over standard black. Minimum pipe roller buildup. Lower maintenance with better quality. Performs well in a broad spectrum of pressroom conditions, providing the quality and efficiency you want. Less than 5% VOCs. Helps you stay in compliance with the toughest EPA regulations at all levels. Conforms to ASA standards.	
TRVB	TRVB-0003	Maximum rub resistance. Over 70% better than standard black. Delivers sharp halftones, smooth solids with super density, plus unbeatable mileage. Maximum soy content.	
TRVB	TRVB-0004	Great ink transfer and laydown for vibrant color. Starts up faster. Gives you cleaner, brighter, vibrant colors that make your ads pop. A consistent performer. Make your settings, and it runs hassle-free. Cuts down paper lint buildup on blankets and plates.

V24L	V24L-0001	Bio toner represents the latest environmental breakthrough in office printing! Made from renewable, environmentally-friendly renewable resources such as soy, corn or cottonseed oil, our LaserMonks Bio-Renew toner allows you to print greener without sacrificing cost, quality or page yield! Every conventional petroleum-based toner cartridge contains two liters of petroleum oil. Our eco toner replaces a part of the petroleum oil with renewable eco-friendly, USA farmed products.

Inks - Sheetfed	B9D5	B9D5-0001	SoySeal-certified manufacturer for sheet-fed soy ink.
	E6M3	E6M3-0001	Series of high quality sheet fed vegetable-based inks are formulated for a wide range of applications. They can be used in all types of multi color presses, on both paper and board substrates. Vision inks are fast setting and rapid drying, but can stay open in the fountain and on the press for extended periods of time. In addition to offering excellent press stability, these products can be UV coated, foil stamped, laminated, and used for post laser imaging application. These inks are available in regular and low tack four color process, in Pantone mixing bases and blends, and in special color match requirements.
	K773	K773-0006	
	K773	K773-0007	
	K773	K773-0005	Blending inks use a combination of vegetables oils and contain less than 3 percent petroleum distillates. Inks are an example of Our commitment to developing environmentally friendly ink products that minimize volatile organic compounds (VOCs).

X383	X383-0005	This vegetable oil-based series of inks qualifies for Soy Seal Approval and promotes quick set and positive dry on enamel, board and uncoated sheets. In-Line and Off-line Aqueous Coatable, Off-Line UV Coatable, Laser Safe, Laminates well and is Foil Stampable. This product is formulated around renewable resources.
CV9G	CV9G-0002	SoySeal-certified manufacturer for sheet-fed, heat-set and business-form soy ink. All inks offered by us can be turned into a soy ink by adding a soy resin. These soy inks contain 20% soy resin. Some side effects associated with adding the soy resin include decreasing dry rate, properties, and decreasing the strength of the ink. However, all of these side effects can be altered by changing the formulation of the ink.
CV9G	CV9G-0003	SoySeal-certified manufacturer for sheet-fed, heat-set and business-form soy ink. All inks offered by us can be turned into a soy ink by adding a soy resin. These soy inks contain 20% soy resin. Some side effects associated with adding the soy resin include decreasing dry rate, properties, and decreasing the strength of the ink. However, all of these side effects can be altered by changing the formulation of the ink.
W35H	W35H-0018	Ink that is ideal for light-weight or poor surface quality stocks. It can even print well on very lightweight papers and recycled stock. The fast-setting ink offers improved 'through' drying for faster turnaround times, combined with good press stability.
W35H	W35H-0014	Our inks are one of the most consistent, robust, and versatile ink series available today.
W35H	W35H-0015	Our inks are one of the most consistent, robust, and versatile ink series available today.
W35H	W35H-0016	Our inks are one of the most consistent, robust, and versatile ink series available today.
W35H	W35H-0017	Our inks are one of the most consistent, robust, and versatile ink series available today.
W35H	W35H-0022	With unparalleled consistency, effortless runability, and vibrant, high-strength color, Our sheetfed inks exemplify superb chemistry and advanced engineering in a premium ink system.
W35H	W35H-0013	Its fast drying properties can result in increased print output. The inks are ecologically friendly. Produce sharp dots, offer excellent ink/water balance, impart high color intensity, and perform well on numerous substrates.
HOE8	HOE8-0001	SoySeal-certified manufacturer for color newsprint, sheet-fed and business form soy ink. Up to 80% soy oil. Some products also contain linseed oil.
HOE8	HOE8-0002	SoySeal-certified manufacturer for color newsprint, sheet-fed and business form soy ink. Up to 80% soy oil. Some products also contain linseed oil.

A3N2	A3N2-0009	This soy ink is specially formulated for sheet-fed, in-line wet trap application.
A3N2	A3N2-0010	Safe for commercial printing are fomulated with the maximum level of renewable vegetable oils possible. These inks are soy based and contain less than 1% Volatile Organic Compounds (VOC's). This allows pressrooms to be well ahead of compliance requirements as they are established from state to state.
A3N2	A3N2-0004	Specially formulated to provide greater density. Provides excellent gloss, rub resistance and dot reproduction, and exhibits faster set speeds than conventional soy black inks. These inks are soy based and contain less than 1% Volatile Organic Compounds (VOC's). This allows pressrooms to be well ahead of compliance requirements as they are established from state to state.
A3N2	A3N2-0005	Rotary web process inks have been formulated for excellent transfer in the high speed rotary offset arena. Far from a simple forms ink, because of its exceptional transfer capacity it will allow the web printer to achieve brighter colors, denser blacks and sharper screen tints with far less solid ink density. Our unique soy based vehicle will achieve a harder finish for better scuff resistance than conventional forms inks. This series is considered finishing friendly in every way, including laser compatibility. Inks contain less than 1% VOC's which virtually eliminated ink oil contributions to a printer's total VOC emissions! Inks contain at least 20% soil oils.
A3N2	A3N2-0002	Prints sharper and denser with faster drying, improved rub resistance and reduced linting. Soytech inks contain less than 1% VOC's which virtually eliminated ink oil contributions to a printer's total VOC emissions! Soytech inks contain at least 20% soil oils.
QJ7T	QJ7T-0001	Vegetable-based sheet-fed ink gives excellent print quality, unsurpassed trap, print sharpness, rich color and gloss. Hard dry properties provide a powerful tool to deal with difficult stocks and circumstances requiring maximum rub resistance.
QJ7T	QJ7T-0002	Vegetable-based sheet-fed ink's hard dry properties provide a powerful tool to deal with difficult stocks and circumstances requiring maximum rub resistance.
QJ7T	QJ7T-0003	Series vegetable-based sheet-fed inks are ideal for blister pack packaging products. Our packaging applications need excellent adhesion for securing products.
QJ7T	QJ7T-0004	Our sheet-fed inks yield excellent results on a variety of stocks when used on today's small presses. Predictable performance and a wide window of operation make these inks the ink of choice on duplicators. Handschy's stringent quality control procedured guarantee accurate color matching and high visual impact. Inks are high in strength and will satisfy the most critical color requirements.

QJ7T	QJ7T-0005	Specifically designed for smaller presses, the ink of choice with predictable performance and a wide window of operation. Vegetable oil based inks yield excellent results on a variety of stocks when used on todays small presses.
QJ7T	QJ7T-0006	Vegetable oil based ink series can be utilized when maximum fade and alkaline resistance are needed.
QJ7T	QJ7T-0007	Performance engineered vegetable-based to yield maximum print performance. Medallion series UV inks consistently produce outstanding results in a wide variety of applications. Medallion's excellent water tolerance opens the window of operation and brings consistent results
QJ7T	QJ7T-0008	Series vegetable-based UV inks consistently produce outstanding results in a wide variety of applications. Our excellent water tolerance opens the window of operation and brings consistent results. With fine dot definition and predictable performance you will produce jobs that will please your customers time after time.
QJ7T	QJ7T-0009	Our vegetable-based sheetfed metallic inks are the best choice for high quality commercial printing. We incorporated the latest in resin and varnish technology and is press proven around the world. Handschy metallic inks should be used whenever the utmost in metallic brilliance and outstanding gloss are required, as well as for other printing applications such as labels and folding cartons
DHA5	DHA5-0003	The vegetable oil content, in the form of linseed oil, ranges from 16 to 36% by weight. The inks also contain from 10 to 21% by weight of hydrotreated petroleum distillates. Available in yellow, warm red, rubine red, rhodamine red, non-permanent 032 red, violet, reflex blue, process blue, purple, green, transparent white, and tinting black.

TXQN	TXQN-0011	<p>We've added an extension to our family of forms inks with the new series. These inks are specially modified versions of Soytex inks available in a full range of base mixing colors, black and extender. Unlike regular inks, the new series features enhanced drying characteristics and high solids content: both properties necessary for a successful laser-ready ink. All the Colors contain 20-25% soybean oil, and have no more than 7% VOC content. Inks get their extra drying "kick" from a liberal addition of Chinawood Oil (aka: "Tung" oil). Well known as nature's most aggressive drying oil, Chinawood Oil helps inks air-dry to a tougher, more durable film than regular Soytex inks, which dry primarily by penetration. Within 36 to 72 hours after impression, inks polymerize enough to satisfactorily withstand the fuser roller temperatures found in most laser printers and copiers without resoftening. Inks will stay open in the can for weeks at a time, yet start polymerizing within hours after impression. Also, up to 0.5% (assuming 6% metal content) of metallic driers can be added to inks to speed up drying to just several hours. Are 100% compatible with other products. As a matter of fact, you can intermix both series inks and still come out with good color matches. Base mixing colors are available in the following shades: Process Blue, Phthalo Green, Rubine Red/Process Red, Rhodamine Red, Process Yellow, Purple, Reflex Blue, Violet, Warm Red, Process & Neutral Black</p>
TXQN	TXQN-0010	<p>Our most popular forms series! Looking for a set of base mixing colors for Business Forms work? Do they have to be high solids, and soy oil-based? Is price a MAJOR concern? Look no further you've found what you're looking for with our 3 PLS Series colors. These nine base mixing colors are an outgrowth of our now world-famous Business Forms colors. These base mixing colors are available in the following shades: Process Blue, Phthalo Green, Rubine Red/Process Red ,Rhodamine Red ,Process Yellow, Purple, Reflex Blue, Violet, Warm Red. All our Colors contain 20-25% soybean oil, and have no more than 7% VOC content. Modified to be completely compatible with the popular Color Selector Guide, these colors are balanced to work in perfect harmony with each other. No more digging flushes, no more mess: just weigh, mix, and package!</p>
TXQN	TXQN-0008	<p>Introduced as the successor to our Petroleum-based Forms inks, we offers the same great overall performance in a business forms ink with a soy oil base. We prints with a rich, dense black tone and is strong enough not to need any extra toners. Plus, this product is low in VOC's, having less than 5% of them in its regular version. This product, also known as plain and is available as a "no minimum order" item.</p>

TXQN	TXQN-0009	<p>These products span a spectrum that includes both process and some popular base colors. Are clean and bright, delivering quality results in such critical areas as the printing of delicate process shades and flesh-tones. All the colors contain 20-25% soybean oil, and have no more than 7% VOC content. And because colors have a very high resin content, they deliver excellent rub resistance only minutes after impression. Colors are made with "Our Extender", which is a 100% solids, soy oil-based transparent extender vehicle with medium tack, neutral color, and a viscous semi-gelled body. In the manufacture of colors, only two main ingredients are used: a flushed pigment and our Extender vehicle. So even if you don't wish to purchase Soytex Colors, you can use your own quickset or heatset flush along with Soytex Extender to make your own version of our Colors. Additionally, we now are able to offer "Dry Offset" versions of our colors on a special order basis.</p>
TXQN	TXQN-0012	<p>Introducing; the press-ready commercial litho ink that dries setoff-free in less than 5 minutes, yet stays open on the press overnite and fresh in the can for days. Use this product wherever there is commercial printing on paper substrates. This product works well on a wide variety of stocks including quality offset stocks, and coated stocks of virtually all basis weights. Since this product is a true oil-based litho ink, it has a great deal of compatibility with many graphic arts chemicals. Ink conditioners and gel reducers will all work well with inks. This product contains high-melt polyethylene wax and a trace amount of PTFE wax. This means that, with the proper precautions, this product can be used with or without overprinting right out of the can. This product is a true quickset ink. The word "quickset" is used widely to describe the drying mechanism where the initial "setting" occurs by means of the liquid portion of an ink (i.e.: solvents and oils) quickly seeping into the fibrous matrix of the paper substrate immediately after impression, leaving a dry layer of resin and pigment on top of the ink film. This "set" film feels dry to the touch and does not offset onto other sheets easily. Later, the quickset ink's film actually "cures" by chemically converting the vegetable oil-based portion of the ink through the process of oxidation polymerization, further anchoring the ink film to the substrate. What makes us unique is its ability to achieve initial setting so rapidly, then start curing in hours without the aid of conventional driers like cobalt and manganese. To ensure maximum set speed and hardness of cure, we uses no soy oil, but contains 25% vegetable oil. The ability of inks to convert and form tough films should not be overlooked. This can be a very helpful asset when you encounter tough assignments like semi-porous stocks, packaging applications and even some nonporous stocks like polyester films. We</p>

API2	API2-0009	Series inks were designed to be very environmentally friendly, yet perform extremely well under the most demanding lithographic conditions. These process inks offer very low VOCs, a very high level of vegetable oil and still set quickly on most types of paper. We have formulated this series to come to color fast, maintain density well during press runs and print well with outstanding dot reproduction properties. Total vegetable oil content is 38-51%. Total soybean oil content is 12-16%.
API2	API2-0008	Process inks offer outstanding applied economics and perform well under a wide variety of lithographic conditions. These process inks offer a wide water window and set very fast. Has formulated these inks to come to color quickly and are easy to use. This set of process inks allow printers to work and turn jobs quickly. Vegetable oil content is 19-28%.
API2	API2-0007	Sheetfed offset inks are formulated to use vegetable oils with high levels of soybean oil American Soybean Association certified. These inks offer low volatile organic compound levels (VOCs). Our process inks provide exceptional transfer, wide water window, fast setting properties and offer outstanding mileage. In addition, these inks are Stay-Open which means that they are slow to skin in press fountains. This product's polymer technology allows for fast dry times and good rub resistance. Low volatile organic content. Total vegetable oil content 26-36% and soybean oil conten 20-22%.
API2	API2-0006	Our inks represent an unprecedented technological advancement designed to maximize productivity, improve print quality and reduce the total cost of printing. These inks were developed through the combined efforts of Sun Chemical and VOC Free Inc., a specialty research group. This is a unique conventional sheetfed offset ink system formulated to dry synergistically on paper in minutes instead of hours while offering superb press stability. No thermal, IR, UV, or EB energy is required. Very low volatile organic content. Vegetable oil content is 28-35%.
API2	API2-0002	Our inks are formulated to provide overnight stability for reduced wash-up time. This series offers quick work and turn and can be used for perfecting job requirements. Our inks accept UV coating, foil stamping, lamination, and laser printing.
API2	API2-0004	Our inks are manufactured with a perfect combination of soybean oil and other plant source material, and they are available in a eleven-base color blending system. With a transparent white and two blacks (neutral and dense), printers can provide customers every color they specify for both short and long run orders.

API2	API2-0005	Our process inks offer excellent economics and ease of use. This set of process inks provides a wide water window and can be used under a variety of lithographic conditions. Our inks are fast setting, yet stay open well in ink fountains. Our inks offer very good gloss and rub resistance properties. Inks contain 22-34% vegetable oil.
API2	API2-0001	Minimize downtime caused by repeated clean-ups that are required with conventional heat resistant inks. We have specially formulated soybean-based ThermoFite inks to prevent ink drying on rollers, blanket, and plates - they will not skin and will stay open on the press overnight. Withstanding high-speed laser printer temperatures, our inks will not soften, set-off, or block. These inks will increase pressroom efficiency and lower VOC emissions. Our inks are available in an eleven-base color blending system that allows printers to offer unlimited color options.
API2	API2-0003	Top quality sheetfed offset inks for 4-color process printing in the widest range of applications on paper and board. For use on all types of sheetfed presses including 8, 10, and 12 color multicolor perfecting machines. Exceptional lithographic stability. Fast setting and rapid drying for fast further processing. Suitable for publication and commercial printing, packaging, and wet glue seals. Vegetable oil based.
WP11	WP11-0007	Large variety of colors. Industrial and consumer uses. Formulated with a special blend of vegetable oils that offers lower levels of VOCs.
YZVW	YZVW-0002	SoySeal-certified manufacturer for sheet-fed and heat-set soy ink.
YNSR	YNSR-0002	SoySeal-certified manufacturer for black newsprint, color newsprint, sheet-fed, heat-set, cold-set, business-form and flexographic soy ink.
YNSR	YNSR-0003	To complement our growing range of mineral oil free and vegetable oil-based products, a full range of one-pack of sheetfed offset inks are now available under our trade name. These are the first truly mineral oil free vegetable oil-based metallic inks on the market and represent the result of joint development work with the supplier.
DV0Z	DV0Z-0002	Lithographic Offset Inks (Sheetfed)
BWQ6	BWQ6-0002	Newest commercial soy-based ink series. It is manufactured for the printer who is looking for strong contrast and high density while maintaining low dot gain. It is compatible with UV and aqueous coatings. Low, medium, and high tacks are available to provide the latitude necessary to accommodate the various printing conditions and paper stock you may encounter.

	BWQ6	BWQ6-0001	Is an environmentally friendly sheet-fed ink formulated with 20% soy oil. It is approved by the American Soybean Association and carries the Soyseal trademark. Both low and medium tacks are available to provide the latitude necessary to accommodate the various printing conditions and paper stock you may encounter.
Packing and Insulating Materials	BP37	BP37-0061	A corrosion protection packaging material. It is stronger than corrugated paper without the high breakdown rate, tearing, dust or pollution.
	BP37	BP37-0066	Extruded (non-woven) from the highest quality PE resin and Cortec Multimetal VpCI™s.
	BP37	BP37-0103	A packaging product coated with a barrier coating. One of its key features is that it is fully repulpable while displaying barrier properties similar or better than those of wax or polyethylene coated paper or linerboard.
	BP37	BP37-0203	A tarnish inhibiting packaging paper specifically for precious metals such as silver, gold and tin.
	QB79	QB79-0001	A superior standalone protective packaging material made from 100% biodegradable recycled corrugated cardboard boxes. It is a static-free replacement for plastic and petrochemical packing materials, including bubblewrap and packing peanuts, air bags, foam and the like. It stands up to and stabilizes heavy weight within a box. Its natural absorbency makes it an excellent choice for shipping liquids, since small leaks are contained. It has been tested and approved by UPS at the Illinois labs. Its design lattices together to hold items suspended in the center of the box, surrounded by 360 degrees of cushioned cardboard. Simulates double boxing without the cost of a 2nd box. Low dust. Good for the environment.
	LC14	LC14-0002	Starch-based packing peanuts.
	CT7I	CT7I-0001	Originally consisted of a rubberized and bound animal hair. Its unique buffering properties made it the choice for important cushioning applications. Over the years, the uses for Wollastic™ continued to expand into other areas, such as padding for furniture and absorption material in military applications. Today, the product is made from environmentally friendly vegetable fibres and continues to grow into new markets, such as filtration and erosion control products.
	MS4T	MS4T-0001	Made of corn or wheat starch in a manner similar to breakfast cereal, this product provides excellent cushioning protection.
	F5GM	F5GM-0001	Fully compostable in accordance with internationally accepted standards. These films are ideal for thermoforming into trays for fresh produce, salads, and bakery products.

L5RD	L5RD-0003	A viable option for envelope windows. Our product offering consists of clear or matte film for your windowing applications. The United States Postal Service standard for haze and gloss are met or exceeded with this product. Readability is not compromised as it passes the USPS Optical Character Recognition Machine standards, including MERLIN, and the dimensional and environmental stability of this film eliminate potential puckering and warping. Little or no machine adjustments have to be made when switching from glassine to PLA. To make your choice even easier, the same glue can be used in attaching your window film as what used with polystyrene or glassine film.	
XX6X	XX6X-0001	Starch-based resins used in injection molding and other processes.	
FK4P	FK4P-0001	Starch based and decompose in water. Made from annually renewable resources. Water soluble, does not pollute groundwater.	
HH8H	HH8H-0001	Decomposes in water leaving no toxic waste. FDA approved. Statuic-free organic cornstarch. Dispenses and vacuums like traditional peanuts. Ships via UPS oversize.	
Pneumatic Equipment Lubricants	G4Z2	G4Z2-0029	An environmentally friendly, people friendly lubricant for compressed air systems, pneumatic tools and automated equipment.
	G4Z2	G4Z2-0038	A readily biodegradable, heavy duty rock drill lubricant designed to meet the requirements of pneumatic tools, down-hole, and surface drilling equipment. It is formulated with high viscosity index vegetable base oil, anti wear additives, and corrosion protection.
	G4Z2	G4Z2-0039	A readily biodegradable, heavy duty rock drill lubricant designed to meet the requirements of pneumatic tools, down-hole, and surface drilling equipment.
	G4Z2	G4Z2-0045	A series of readily biodegradable renewable resource, non-toxic oils designed to give maximum protection to pneumatic percussion rock drills, jackhammers and drifter drills.
	G4Z2	G4Z2-0055	the ideal environmentally friendly solution for drill rod applications. It is formulated from high purity vegetable oils and thickened with very shear stable lithium soap. The additive package contains the latest in ashless, environmentally friendly, rust and antiwear technology. Our drill rod grease is designed to function at temperatures well beyond the limits of other pure vegetable based products.
	BLX9	BLX9-0001	This drill oil meets all EPA standards for biodegradability.
	VL67	VL67-0001	A unique product developed for all types of drilling where rock drill oils are used, such as D.T.H., air tracks percussive drills, casing drivers and top hammers to save wear and improve their performance.

HHU3	HHU3-0003	Our Highly Biodegradable, no-sheen Antiwear Lubricants can offer dramatic protection against bearing wear, rust & oxidation. Used to lubricate motor and pump bearings, turbines, compressors and other applications that require enhanced lubrication and environmental sensitivity. Our Lubricants are made from carefully chosen synthetic esters for the ultimate in heat and wear resistance. The additives used in our Highly Biodegradable Synthetic Antiwear Lubricant not only reduce friction, but coat your gears with antiwear, R&O (antirust) and mild EP protection.
I3F9	I3F9-0002	An environmentally friendly, people friendly lubricant for compressed air systems, pneumatic tools and automated equipment. Formulated for maximum performance in work environments subject to OSHA regulations, environmentally sensitive areas, and operations requiring reduced VOCs. It's anticorrosion, anti-misting, de-gumming and lubricity provide superior equipment lubrication and protection. Readily biodegradable, non-toxic and high biomass formula. Highly renewable resource content per Executive Order 130101. Contributes virtually no VOCs to the workplace.
PH64	PH64-0017	Fully synthetic rapidly biodegradable compressor lubricant for use in artificial snow generators and distributors under the toughest conditions
PH64	PH64-0025	Fully synthetic rapidly biodegradable vacuum pump oil
PH64	PH64-0026	Fully synthetic rapidly biodegradable pneumatic tool oil, with an additive to improve adhesive and form a durable lubricant film. Binds condensate water (prevents icing) for excellent compatibility with winter conditions.
R071	R071-0009	Our lubricants are premium quality Biobased products formulated from renewable, biodegradable USA-grown vegetable oils. These quality lubricants are designed to replace and mix readily in conventional petroleum products to help you and your customers use safer and more environmentally friendly lubricants.
MWQ9	MWQ9-0007	The biodegradable lubricant for the best-performing air tools on the market. Its unique formula, exclusive to us, brings with it exceptional properties which allow it to outclass all mineral and synthetic biodegradable products. This product traps and eliminates water in the conduits; it also provides superior resistance to oxidation and corrosion. These characteristics along with excellent anti-foaming properties result in better lubrication, lower risk of equipment corrosion and longer-lasting lubricant.

RGWJ	RGWJ-0015	<p>Our Bio-Rock Drill Oils are ultimately biodegradable vegetable oils formulated with Antiwear/EP, rust and oxidation inhibitors and a tackifier. Performance is enhanced by use of the Stabilized HOBS's natural composition, which provides an oily boundary film. The super high viscosity index of the Stabilized HOBS adds additional lubrication qualities to this high performance lubricant. Laboratory and field tests have shown that the products provide exceptional equipment protection at higher temperatures. These biobased products have exceptional benefits over petroleum-based lubricants because there is direct danger of polluting the air, water, soil, or work environment through loss of the lubricant.</p>
RGWJ	RGWJ-0017	<p>Biodegradable. Recommended in the dairy industry for automatic milking machines and most other vacuum pump applications.</p>
RGWJ	RGWJ-0045	<p>A specially formulated, ultimately biodegradable air tool lubricant designed to replace petroleum based air tool oils. Food Grade Air Tool Lubricant is designed to be commonly used in food processing equipment as it is essentially odorless and tasteless. Because of the super high viscosity index of the HOBS, this biobased product performs in many applications. The natural oily film of this product has shown in laboratory and field tests to out perform petroleum base oils in terms of natural lubricity. This air tool oil provides excellent lubrication for both rotary and reciprocating types of air tools, such as chipping hammers, impact wrenches, air motors, grinders, reamers, drills, etc. It can be fed through an airline lubricator or by a squirt can directly into the tool through the quick coupling air connection. Air Tool Lubricant can be very effective on the lift cylinders of can fillers in breweries, bottling plants and canning plants. This product has exceptional benefits over petroleum oils in these applications because there is direct danger of polluting the air, water, soil, or work environment through loss of the lubricant.</p>

RGWJ	RGWJ-0046	<p>Air Tool Lubricants are specially formulated, ultimately biodegradable air tool lubricants designed to replace petroleum based air tool oils. Because of the super high viscosity index of the HOBS, these biobased products perform in many applications. In addition, these products emulsify water for improved lubricity in moist conditions and provide anti-misting. The natural oily film of these products have shown in laboratory and field tests to out perform petroleum base oils in terms of natural lubricity. These air tool oils provide excellent lubrication for both rotary and reciprocating types of air tools, such as chipping hammers, impact wrenches, air motors, grinders, reamers, drills, etc. They can be fed through an airline lubricator or by a squirt can directly into the tool through the quick coupling air connection. These products have exceptional benefits over petroleum oils in these applications because there is direct danger of polluting the air, water, soil, or work environment through loss of the lubricant. Air Tool Lubricants are ENVIRONMENTALLY RESPONSIBLE lubricants that are formulated from renewable agricultural plant resources. We believe Earth's environmental future rests in the use of renewable material.</p>
RGWJ	RGWJ-0047	<p>Fluid is an ultimately biodegradable, biobased/synthetic formula that replaces hydrocarbon oil based compressor fluids. The super high viscosity index of the HOBS is combined with a biobased synthetic ester that improves the thermal shear stability of the formula and increases load capacity.</p>
XN42	XN42-0005	<p>Fluid is an ultimately biodegradable, biobased/synthetic formula that replaces hydrocarbon oil based compressor fluids. The super high viscosity index of the HOBS is combined with a biobased synthetic ester that improves the thermal shear stability of the formula and increases load capacity.</p>

XN42	XN42-0006	<p>Air Tool Lubricants are specially formulated, ultimately biodegradable air tool lubricants designed to replace petroleum based air tool oils. Because of the super high viscosity index of the HOBS, these biobased products perform in many applications. In addition, these products emulsify water for improved lubricity in moist conditions and provide anti-misting. The natural oily film of these products have shown in laboratory and field tests to out perform petroleum base oils in terms of natural lubricity. XN42	XN42-0104	Biodegradable. Recommended in the dairy industry for automatic milking machines and most other vacuum pump applications.	
I6TH	I6TH-0024	Vacuum Pump Oil is an ultimately biodegradable vegetable oil formula that is recommended in the dairy industry for automatic milking machines and most other vacuum pump applications.	
Wood and Concrete Stains	V2VO	V2VO-0001	This product is the world's leading bio-based semi-transparent penetrating concrete stain technology that outperforms all other decorative concrete stain products. The advanced chemical engineering with a patented soy ester modified dispersion technology, provides designers, installers, and end-users unparalleled durability, sustainability, and decorative style. It is a green building compliant, non-hazardous, ultra-low VOC, acid-free, decorative concrete stain that provides the variegated look of acid stain, but with more consistency, control, flexibility, ease of use, and faster installation time without sacrificing performance integrity. Allows professional decorative concrete artisans to create designs and colorization never before possible. Choose the preferred acid stain alternative!

BL30	BL30-0001	Our product is the world's leading bio-based semi-transparent penetrating concrete stain technology that outperforms all other decorative concrete stain products. The advanced chemical engineering with a patented soy ester modified dispersion technology, provides designers, installers, and end-users unparalleled durability, sustainability, and decorative style. Allows professional decorative concrete artisans to create designs and colorization never before possible. Choose the preferred acid stain alternative!
CYTR	CYTR-0005	This Oil Wax Finish is an organic plant-based premium hardener and sealer for unfinished woods. It is an ideal choice for all ready to finish wood, bamboo and other interior wooden surfaces including children's furniture and toys. It contains a sophisticated combination of natural resins and waxes that together create a durable, water repellent, water-mark resistant finish and sealer, enhancing and maintaining wood beauty and breathability.
Q14G	Q14G-0044	For light-coloured, Scandinavian style wooden floors: lye pigmented slightly white designed for new, sanded, solid deciduous wood inside. Following the application, treat with our Wood soap No. 403 or our Wood soap, white No. 404. Provides an open-pored, entirely moisture vapour permeable finish with a very light-coloured and natural look. Recommended for use on little frequented rooms, e.g. bedrooms or guestrooms as the product is only little dirt-repellent. Apply with a paint brush, wide paint brush or foam roller.
Q14G	Q14G-0061	Silk gloss stain for wood inside and outside (use colourless inside only). Good weathering resistance, quick drying and natural lemon fragrance. Available in 18 trendy, cheerful colours and colourless. Tested and certified 'safe for toys' and 'saliva- and perspiration-proof'.
Q14G	Q14G-0062	Refined look for your wooden garden furniture: water- and dirt-repellent oil with natural lemon fragrance available in three colour shades: Teak (No. 102-81) Bangkirai (No. 102-85), and natural (No. 102-92) (pigmented white). Does not flake and is easy to apply with a cloth or paint brush. Apply one coat of oil at the beginning of the season and in autumn to make your garden furniture look like brand new.

Q14G	Q14G-0045	For light-coloured, Scandinavian style wooden floors: lye pigmented slightly white designed for new, sanded, solid coniferous wood inside. Following the application, treat with our Wood soap No. 403 or our Wood soap, white No. 404. Provides an open-pored, entirely moisture vapour permeable finish with a very light-coloured and natural look. Recommended for use on little frequented rooms, e.g. bedrooms or guestrooms as the product is only little dirt-repellent. Apply with a brush, wide paint brush or foam roller.
Q14G	Q14G-0016	Nominated test winner by the German 'Stiftung Warentest' (Organization for the Comparative Testing of Consumer Goods) (Issue 05/2006, test on wood stains). Water-thinnable, solvent-free, silk gloss woodstain for wood inside and outside (colourless for inside only). Good weathering resistance, quick drying and virtually odourless. Available in 24 trendy, cheerful colours and colourless. Tested and certified 'safe for toys' and 'saliva- and perspiration-proof'. Pretreat wood types rich in active substances with Special primer No. 117.
VMAF	VMAF-0001	A non-toxic soy based semi-transparent penetrating concrete stain that is virtually odorless and creates beautiful natural color variations unique to each surface. The advanced penetrating and "goof proof" technology provides a surface stain that is easy to apply and won't flake, chip or peel.
OOGA	OOGA-0033	A non-toxic, acid-free, bio-based, semi-transparent penetrating concrete stain that is virtually odorless and creates beautiful natural color variations unique to each surface. The advanced soy ester dispersion technology delivers penetrating performance without leaving a topical film that will flake or peel.
OOGA	OOGA-0034	A non-toxic professional grade natural penetrating bio-based wood stain made from soybean oils that preserves wood surfaces and creates a beautiful, rich natural look. Soy ester penetrates into growth rings and continues to spread and seal throughout the wood all year around. Achieves enhanced wood protection and colorization. This product is virtually odorless and contains no hazardous ingredients.
K7RD	K7RD-0001	Designed for production use, they are liquid versions of the our consumer semi-gel water based wood stains. They may be sprayed or hand wiped. Custom colors available upon request. Recommended atomizing sets: .043 -.051 tip and nozzle, No. 9 air cap.
MDJQ	MDJQ-0002	A non-toxic soy based semi-transparent penetrating concrete stain that is virtually odorless and creates beautiful natural color variations unique to each surface. The advanced penetrating and "goof proof" technology provides a surface stain that is easy to apply and won't flake, chip or peel.

IX91	IX91-0001	A professional grade, semi-transparent architectural penetrating concrete stain made from bio-based soy technology. An acid-free, non-toxic concrete stain alternative that is ideal for all interior and exterior porous surfaces such as: concrete, masonry, brick, stucco, fiber cement, rammed earth and natural stone surfaces. The advanced technology will provide you with more than double the spread rate compared to competitive products. You simply can't find a safer, more flexible or more affordable decorative concrete stain.
IX91	IX91-0002	A professional grade natural wood stain made from soybean oils that preserves wood surfaces and creates a beautiful, rich natural look. Unlike conventional wood stain products, soy ester actually penetrates into growth rings and continues to spread and seal throughout the wood all year around. This achieves enhanced wood protection and beautiful natural colorization. Enjoy enhanced spread rates that are more than double compared to competitive products, making it very economical at only pennies per square foot.
W7UT	W7UT-0001	Water repellent, open-pored, permeable to water vapor, weather-resistant. DIN 53 160 certified for colour fastness when exposed to perspiration and saliva. DIN EN 71 Part 3 certified as suitable for toys. Contains no protection against blue staining fungi. It contains biobased products like Linseed oil- Stand oil, natural resin, wood oil. etc
W7UT	W7UT-0020	For all interior and exterior wood surfaces. Only for interior use: clear, spruce and white. Not suitable for walking areas such as balcony floors, terraces and stairs. Contains linseed oil, stand oil, natural resin ester, iron oxide and mineral pigments, wood oil, micronized wax, orange oil, isoaliphates, alumina, and drying agents free of lead.
WI78	WI78-0001	Our Premium Wood Stain penetrates up to twice as deep as competitive brands to reveal the beauty of natural wood grain. Apply to wood for long-lasting, translucent stain. Uses exclusive soya-oil base and anti-settling formula for better grain enhancement with less stirring during application.
U369	U369-0001	Nothing protects wood outside like our classic product. It was originally engineered to protect log homes, with a three-coat penetrating formula that repels condensed water while allowing water vapor to escape. Not surprisingly, it works just as well on other exterior vertical surfaces, like shakes, shingles, siding and fences. Your wood will be protected with an ultra-violet (UV) and water-repellent shield of lasting and remarkable beauty.

U369	U369-0002	<p>A beautiful deck makes that weekend barbecue perfect. There is simply no better place to be. But with the BBQ, the family and the patio furniture, decks have to handle more traffic than any other wood around your house. That's why this product is designed as a rugged three-coat formula that penetrates deeply, protecting your deck from within. Where film-build coatings can easily peel and scratch, exposing wood to the elements, it provides lasting protection from rain and UV exposure. Since decks see so much wear and tear, they need to be maintained regularly. With this product, you can keep your deck looking beautiful with just a simple cleaning and maintenance coat. And because we offer a range of 79 beautiful colors to choose from - as well as a custom color program - you can be sure of finding one that matches your deck chairs.</p>
U369	U369-0005	<p>Nothing can match the comfort and beauty of wood - especially when it comes to furniture and millwork. Chairs, tables, windows and doors are made of very dry wood; keeping them dry and protected while enhancing beauty, is exactly what this product is designed to do. It is a two-coat film-forming finish that has exceptional elasticity for long-lasting protection against scraping and abrasion. It is ultra-UV resistant and will not darken with time. Because it is a film-forming finish, we do not recommend it for decks or logs.</p>
U369	U369-0010	<p>This product is a industrial-strength penetrating undercoat designed for long-term protection of millwork and wood products. It conforms to WDMA-I.S.4 testing methods and effectively halts tangential swelling and protects against wood discoloration in wood subject to wet conditions. It is environmentally-friendly, non-flammable, low in VOC's and causes no adhesion problems; it provides exceptional dimensional stabilization and leaves no surface residue on wood. Because it is a breathable finish, it prevents moisture from becoming trapped in the wood and causing wood rot.</p>
U369	U369-0003	<p>Pressure-treated wood is ideal for fences, decks and tough outdoor environments. But even though it's treated, it still needs to be protected. Here's why: the process that creates pressure-treated wood also makes it extremely wet. That's why it needs to dry for up to a year before traditional oil- and water-based stains can be applied - and because wet wood is unstable, it can dry unevenly and cause severe warping and checking. It uses water to carry protective oils deep into the wood. That means it can be used even with new pressure-treated lumber, dramatically stabilizing wood cell structures while protecting against weather exposure.</p>

U369	U369-0004	This product is specifically engineered to protect log homes, with a one-coat penetrating formula that repels condensed water while allowing water vapor to escape. Our specially formulated oils and resins penetrate into the wood, providing outstanding weather and ultra-violet (UV) protection. Thanks to our unique water-borne technology, it can be applied to wood even with high moisture content - we let wood "breathe", preventing moisture from getting trapped inside the logs and causing decay. We also make your home look beautiful. And like all of our Stains, it's not harmful to the environment. When you choose our product, your home will be protected with a water-repellant and UV shield of lasting and remarkable beauty.
U369	U369-0013	When it comes to restoring the natural color of even the most damaged and weather-beaten wood surfaces, our Wood-Cleaner should be your first choice. Wood-Cleaner is highly effective in removing unsightly weathering, mold, algæ, mildew, staining and extreme oil and grease - plus it's remarkably easy to use. Simply spray your wood surface, allow to sit for 20 minutes, and then rinse off and allow to dry. Then apply the attached package of our Wood Lightener and watch as it dries and the natural color of your wood emerges once again.
U369	U369-0015	Our Wood Lightener is a neutralizer for both our Wood-Cleaner and our Paint & Stain Remover. It MUST be applied before any other subsequent coatings.
HC84	HC84-0160	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitruue.
HC84	HC84-0159	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitruue.
HC84	HC84-0154	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitruue.

HC84	HC84-0158	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitru.
HC84	HC84-0157	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitru.
HC84	HC84-0156	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitru.
HC84	HC84-0149	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitru.
HC84	HC84-0148	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitru.
HC84	HC84-0152	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitru.
HC84	HC84-0151	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitru.

HC84	HC84-0150	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitru.
HC84	HC84-0153	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitru.
HC84	HC84-0155	Our Oil Wood Stain is a fast drying alkyd stain with excellent color retention. Our Oil Wood Stain prevents grain raising, exhibits good color stability under sunlight and heat and provides deep penetrating action while highlighting the natural beauty of wood. For use on interior wood trim, paneling, doors, cabinets and furnitru.
HC84	HC84-0046	Turn those two- or three-day staining projects into one-day jobs with our product. This versatile system provides all the benefits of a top-quality performer - fast dry times, easy application, and quick clean up - teamed with dozens of color options. Choose the combination of products for your project.
HC84	HC84-0044	Turn those two- or three-day staining projects into one-day jobs with our product. This versatile system provides all the benefits of a top-quality performer - fast dry times, easy application, and quick clean up - teamed with dozens of color options. Choose the combination of products for your project.
HC84	HC84-0042	Turn those two- or three-day staining projects into one-day jobs with our product. This versatile system provides all the benefits of a top-quality performer - fast dry times, easy application, and quick clean up - teamed with dozens of color options. Choose the combination of products for your project.
HC84	HC84-0041	Turn those two- or three-day staining projects into one-day jobs with our product. This versatile system provides all the benefits of a top-quality performer - fast dry times, easy application, and quick clean up - teamed with dozens of color options. Choose the combination of products for your project.
HC84	HC84-0043	Turn those two- or three-day staining projects into one-day jobs with our product. This versatile system provides all the benefits of a top-quality performer - fast dry times, easy application, and quick clean up - teamed with dozens of color options. Choose the combination of products for your project.

HC84	HC84-0045	Turn those two- or three-day staining projects into one-day jobs with our product. This versatile system provides all the benefits of a top-quality performer - fast dry times, easy application, and quick clean up - teamed with dozens of color options. Choose the combination of products for your project.
HC84	HC84-0047	Turn those two- or three-day staining projects into one-day jobs with our product. This versatile system provides all the benefits of a top-quality performer - fast dry times, easy application, and quick clean up - teamed with dozens of color options. Choose the combination of products for your project.
C1UN	C1UN-0001	Low VOC natural agricultural oil based and natural agricultural oil resin based wood stain derived from biobased natural renewable resources. Product contains resins derived from linseed oil and soybean oil. It is a natural castor oil based product. Non-ozone producing, non-ozone depleting formulation. Provides superior wood protection from ultraviolet light, ozone, mold, mildew, algae and water attack
KFA3	KFA3-0001	Low VOC, plant oil based, waterborne wood stain protectant
