

USDA BioPreferredSM Process for Industry Investigation

Product Category

This section details the product category that has been investigated for categorization in the BioPreferred program.

Product Category Investigated: Inks - News

Product Category Description: News inks are used primarily to print newspapers.

Industry Investigation

There are eight main sources of information used to gather data about products for categorization. These include Internet search engines, the Thomas Register, industry associations, GSA and DLA federal specifications search engines, AbilityOne, Green Seal standards, and biobased industry contacts. Each of these sources provides different results. A lengthy, but thorough list of biobased companies which produce the designated product category and performance standards and test methods related to the designated product category can be developed best by utilizing all information sources.

Biobased Company Contacts

Company contacts come as a result of interaction with government officials, researchers, and industry representatives. BioPreferred staff follow-up on personal referrals or potential leads to possible biobased products.

Company	Contact Person	Results
Flink Ink	Rita Conrad	Arrowlith Rub-Free Soy Black Arrowlith Soy Plus Arrowlith Super Soy Soy Ink
VUTek Digital Printing Systems	Craig Moore	Bio Vu (Cyan)

Internet Search Engines

When searching the Internet, each search engine utilizes a different algorithm to find related topics. To maximize results and ensure correct data, keywords are entered into several search engines. Primary search engines include Google, Dogpile, Mamma, and Yahoo.

Search Engine	Keyword	Results

Industry Associations

Industry associations provide a good source to identify potential manufacturers, distributors, determine additional keywords for internet searches, and provide general descriptions of products within a product category. Many associations maintain official websites with lists of member organizations and in some cases catalogs of available products.
