

## **Round 9 AbilityOne Search Results**

A search of the AbilityOne online catalog ([www.abilityone.gov](http://www.abilityone.gov)) indicated that four of the categories being proposed today (Deodorants; Leather, Vinyl, and Rubber Care Products; Lotions and Moisturizers; and Sun Care Products) are available through the AbilityOne program.

While none of the specific products within these categories are identified in the AbilityOne online catalog as being biobased products, it is possible that biobased products are available or will be available in the future. Also, because additional categories of products are frequently added to the AbilityOne program, it is possible that biobased products within other categories being proposed for designation today may be available through the AbilityOne program in the future. Procurement of biobased products through the AbilityOne program would further the objectives of both the AbilityOne program and the Preferred Procurement program.
