

**Contract Categories****Round 9****6/10/2009**

Product Category	Category Description	Contract Category
Agricultural Spray Adjuvants	Additives mixed in the spray tank with the herbicide, pesticide, or fertilizer formulas, that will improve the efficiency and the effectiveness of the chemicals including sticking agents, wetting agents, etc.	Grounds Maintenance
Animal Cleaning Products	Products intended to clean, condition, or remove substances from animal hair or other parts of the animal.	No Appropriate Category
Deodorant	A product, often combined with antiperspirant, for inhibiting or masking perspiration and other body odors.	Custodial and Janitorial Services
Dethatchers	Products used to remove non-decomposed plant material accumulated in grassy areas	Grounds Maintenance
Fuel Conditioners	Products formulated to effectively remove deposits accumulated, increase lubricity, remove moisture, increase the cetane number, and prevent microbial growths within the fuel system. Winter conditioners lower the pouring point of fuels.	Vehicle and Equipment Maintenance
Leather, Vinyl, and Rubber Care Products	Products that help clean, nourish, protect, and restore leather, vinyl, and rubber surfaces including cleaners, conditioners, protectants, polishes, waxes, etc.	Custodial and Janitorial Services
Lotions and Moisturizers	Creams and oils used to soften and treat damaged skin.	Vehicle and Equipment Maintenance
Shaving Products	Products designed for every step of the shaving process, including shaving creams, gels, soaps, lotions, and aftershave balms.	No Appropriate Category
Specialty Precision Cleaners and Solvents	Solvents and cleaners used in specialty removal applications. These materials may be used in either neat solution, diluted with water, or in hand-wiping applications.	No Appropriate Category
Sun Care Products	Sunscreen, sunblock, and suntan lotions are lotions, sprays or other topical products that absorb or reflect the sun's ultraviolet radiation to protect the skin.	No Appropriate Category
Wastewater Systems Coatings	Coatings to protect wastewater containment tanks, liners, roofing, flooring, joint caulking, manholes and related structures from corrosion. Protective coatings may cover the entire system or be used to fill cracks in systems.	Grounds Maintenance
Water Clarifying Agents	Products designed to clarify and improve the quality of water by aiding in biodegradation of excess nutrients, organic matter, and hydrocarbons.	Facilities Operations Support Services
